COST CONSIDERATIONS THINGS TO WATCH OUT FOR

UP-AND-COMING We expect continued growth in the local Bay Area construction market. Looking ahead, the San Francisco Bay Area market is seeing an increase in tenant improvements with return to office initiatives on the rise. Furthermore, we are seeing a continued increase in residential construction.

BIDDING ENVIRONMENT We continue to see the rise of cost escalation in the construction industry, across all market sectors. With this in mind, it is especially prudent to factor this into any project budgeting and modeling.

PROCUREMENT The global supply chain disruption continues to be an issue for the industry, resulting in not only schedule delays but also cost increases. The procurement of the general contractor and subcontractor buyout continues to be important and all project team members need to be aware of these issues so that the process can be as streamlined as possible and solutions can be found together.

CONSTRUCTION COST DRIVERS

MATERIALS	APPROX. CHANGE FROM Q1 2022

CONSTRUCTION COST INDEX, ESCALATION, AND TRENDS

ABOUT THE CHART

RLB's construction cost indexes track the 'true' bid cost of construction, which includes in addition to costs of trade works, the general contractor and sub-contractor overhead costs and fees (profit). The graph shows a comparison between San Francisco and the National average of costs.

WHAT THIS MEANS FOR YOU

Construction costs in San Francisco have been on a steady increase over the last 10 years, out pacing the national average. Given the cost escalation experienced over the last couple of years, RLB is forecasting this to continue over the short- to medium-term.
