### **RIDERS DIGEST** ADELAIDE, AUSTRALIA 52<sup>ND</sup> EDITION

A yearly publication from RLB's Research & Development department. Riders Digest is a compendium of cost information and related data specifically prepared by RLB for the Australian construction industry.

While the information in this publication is believed to be correct, no responsibility is accepted for its accuracy. Persons desiring to utilise any information appearing in this publication should verify its applicability to their specific circumstances. Cost information in this publication is indicative and for general guidance only and is based on rates ruling at Fourth Quarter 2023 (unless stated differently). All figures exclude GST.

### **INTRODUCTION RIDER LEVETT BUCKNALL**

### "CONFIDENCE TODAY INSPIRES TOMORROW"

With a network that covers the globe and a heritage spanning over two centuries, Rider Levett Bucknall is a leading independent organisation in quantity surveying and advisory services.

Our achievements are renowned: from the early days of pioneering quantity surveying, to landmark projects such as the Sydney Opera House, HSBC Headquarters Building in Hong Kong, the 2012 London Olympic Games and CityCenter in Las Vegas.

We continue this successful legacy with our dedication to the value, quality and sustainability of the built environment. Our innovative thinking, global reach, and flawless execution push the boundaries. Taking ambitious projects from an idea to reality.

### "CREATING A BETTER TOMORROW"

The Rider Levett Bucknall vision is to be the global leader in the market, through flawless execution, a fresh perspective and independent advice.

Our focus is to create value for our customers, through the skills and passion of our people, and to nurture strong long-term partnerships.

By fostering confidence in our customers, we empower them to bring their imagination to life, to shape the future of the built environment, and to create a better tomorrow.

Sustainability & Carbon	11

### **COST MANAGEMENT & QUANTITY SURVEYING**

The secret to every project's commercial success, regardless of size, is to balance quality against costs. To help our clients achieve value for money, we offer a host of services from preliminary cost planning to value engineering, advice on comparative costs, materials selection to buildability to post-contract services.

#### **Feasibility Studies**

An accurate feasibility study is an essential prerequisite to any procurement decisionmaking process. A reliable feasibility study assesses the project's viability and offers alternative solutions if the numbers just don't stack up.

Whether a simple developer's return on capital cost feasibility is required or a detailed discounted cash flow feasibility, we can provide expert analysis and materials.

Our dynamic cost benchmarking data, together with expert cost modelling, helps our clients to review alternative design options, explore 'what if' scenarios and identify the most cost-effective options within the parameters of the brief.

#### **Financial Institution Auditing**

Our two-step approach to financial institution audits achieves the best outcomes for our clients. At the pre-commencement stage, RLB expands on the items identified in the financier's brief with a full analysis of all risk-related issues. The result is a comprehensive profile of the project. During the post-contract stage, RLB provides detailed cost-to-complete assessments. This ensures adequate funds, should the financier be required to initiate step-in rights.

We also prepare a pre-commencement report that outlines everything from project costs and adequacy of project documentation to authority approval monitoring, progress payment assessments and recommendations.

#### **Post-Contract Services**

Cost certainty during the construction phase relies on robust methodology and skilled staff. RLB applies proven cost management, monitoring and cost reporting procedures, and leads a productive working relationship with the project team. To manage the costs within the budget and support the project business plan, we:

- Review progress claims for work in progress and recommend payment values
- Monitor documentation changes
- Prepare regular financial statements estimating final cost
- Measure, price, and negotiate variations
- Structure agreement of final account
- Attend meetings to represent the financial interests of the client

#### **Tendering and Documentation**

With a global cost database and powerful software at our fingertips, we provide accurate and detailed tender documentation on some of the world's best projects. We can:

- Preparation of bills/schedule bills of quantities or schedule of rates
- Preparation of bid documentation for tendering contractors
- Provide strategic advice on methods of project procurement and tendering
- Advise on suitability of contractor tender lists
- Review tenders received and reconciliation to budget and recommend contractors
- Attendance at tender interviews

#### Value Engineering & Value Management

Delivering value against the project business plan is always a key measure of success. By integrating value and cost management, RLB has developed a powerful and dynamic approach that delivers the best outcomes. We lead participatory workshops with our clients to challenge options and design assumptions, and to encourage creative and lateral thinking. With a laser focus on both value and cost during the design phase, we deliver savings to the bottom line.

### **PROJECT & PROGRAMMING MANAGEMENT**

The old cliché is true: time is money. That's why clients turn to RLB to manage both cost and time. With a deep knowledge of construction techniques, experience working for owners, developers and contractors, and a global database of up-to-the-minute benchmarks, we create bespoke solutions to ensure projects are completed on schedule and on budget.

#### **Pre Contract**

We often have clients turn to us when their project is simply sketch or a plan on a page. Our experienced team can:

- Prepare constructability reports to support feasibility studies
- Produce development or master programs at the preliminary design stage
- Design construction programs to determine construction timeframes and staging
- Enhance migration and office restack programming
- Prepare staging plans and construction method statements, progress monitoring and reporting, and pre-tender and tender construction programs
- Improve programming governance with contract programming clauses
- Review contractors' tender programs

### Post Contract Audit

Reviewing, monitoring and auditing a contract is a necessary part of any project. RLB's team helps our clients to reassess the highest risk areas and uncover new opportunities. We can:

- Review agreements of contractors' construction programs
- Audit, monitor and report on progress
- Provide independent certifier support for financiers
- Support extension of time claims and litigation
- Advise on programming, project health checks and recovery planning

#### **Litigation Support**

Construction contracts can be challenging to navigate at the best of times. When problems do arise, you need a skilled, experienced team behind you.

The best outcomes always come from the best people. Our dedicated procurement and contractual advisory team guides clients throughout the project process, providing technical support and considered advice in specialist areas, such as dispute avoidance and resolution, and providing expert witnesses. Our claims preparation and defence experts provide strategic advice, management, negotiation and resolution of claims through adjudication or alternative dispute resolution.

RLB can help you with:

- Comprehensive claims management
- Dispute resolution services
- Scope definition claims appraisal
- Documentation and negotiation
- Expert witness and determination
- Arbitration and mediation

### SUPERINTENDENT SERVICES

RLB's skilled professionals utilise their construction knowledge, cost management expertise for progress claim and variation assessments, contract document interpretation proficiency and programming know-how to deliver a full rounded superintendent service to our clients.

The Superintendent must have the trust and respect of all contract parties. RLB are independent to the design and construction processes and the Client, and therefore, we can provide a truly independent, impartial professional service.

If RLB is also undertaking a cost management role on a project, there is efficiency in some of the service delivery.

Expertise and experience backed by a rigorous approach sees us deliver assurance to our clients. RLB understands the importance of a robust methodology to ensure all aspects of the Contract is administered in a fair and diligent manner.

Placing client and contractor needs and project drivers at the core, our Superintendent(s) works closely with stakeholders to meet time, cost, and quality requirements, whilst maintaining predictability, compliance, and rigour at every stage.

### **ADVISORY**

We are driven to ensure our clients' assets operate at maximum efficiency for the longest time and at the lowest cost. It's a challenge, but one we relish.

Certainty of budget expenditure drives many of our clients to look for long-term strategies that span the life of their investment. Total operating costs can often equal several times the initial capital cost. Our experienced team works with owners and occupiers to help them understand the total impact of their buildings.

Among our strategic services, RLB can:

- Deliver total asset management planning to ISO standards
- Provide asset recognition and rationalisation
- Analyse costs and benefits to determine the best options
- Advise on sustainability and environmental performance issues
- Undertake whole-life cost modelling.

### **Asset Relifing**

We help our clients to sweat their assets. RLB has pioneered life-extension and repositioning studies to optimise the use of buildings. This methodology helps our clients to identify if, when and where to spend their money to capture remaining asset values and extend the life of existing buildings.

### **Facilities Consultancy**

As the drive to create smart, sustainable assets grows, and as technology develops at pace, the challenge is not only to maximise and measure the performance of built assets. It is also to optimise the efficiency of those assets for both building owners and occupiers over the long term. To help our clients make the most of their assets through the entire life cycle, we can:

- Deliver facilities management planning and building quality assessments
- Audit facilities and operational performance
- Forecast maintenance planning and operating expenditure
- Conduct performance reviews, benchmarking, and post-occupancy evaluations
- Undertake space audits and utilisation studies

### **ADVISORY**

#### **Risk Mitigation and Due Diligence**

Information is power, and our clients are increasingly looking for more detail to assist with decision-making, enhance value and mitigate risks.

We help our clients plan for their next projects by conducting risk assessments to review the scope of required work, identify and analyse project risks, prioritise key issues, and develop risk management action plans.

Among RLB's key advisory services to help you mitigate risk on your next project, we can:

- Review the scope of required work to identify project risks
- Forecast capital expenditure
- Prioritise key issues
- Develop risk analysis and customised risk-management action plans
- Assess insurance replacement costs assessments
- Undertake technical due diligence (for owners, vendors, purchasers, and tenants)
- Advise on services procurement, outsourcing, compliance, and supply chain issues

#### **Property Taxation**

The best financial, compliance and management outcomes can only be achieved with the right taxation advice. And that requires the best people behind you.

RLB's experience in property taxation covers all asset types. We provide proactive reporting and analysis of taxation changes – and help you to understand how they may affect your real estate decisions, including capital gains tax, land taxes, rating assessments and stamp duty.

We provide advice on capital allowances and property tax assessment, depreciation, inventories, and asset registers, as well as changes in tax legislation, as you optimise both existing assets and new projects.

#### **Procurement Strategies**

Choosing the best procurement strategy is at the heart of any project's commercial success. But in a market of escalating costs, this is easier said than done.

With each client's principal objectives in mind – from design quality and workmanship to cost certainty and program – we provide recommendations to achieve the optimum procurement strategy.

With our vast experience and knowledge behind us, RLB works with our clients to examine the issues and evaluate project or service delivery. We can:

- Deliver needs analysis and brief definition
- Undertake feasibility studies
- Assess options for clients to develop, own and lease
- Negotiate contractual arrangements
- Monitor and certify projects
- Lead workshops to uncover value engineering options.

RLB's expertise and experience extends to property transactions, services procurement, outsourcing operations, and supply chain management. Our clients want certainty in contractual outcomes, which is why they turn to RLB.

### SUSTAINABILITY & CARBON

RLB's sustainability consultancy service covers all cost aspects of the sustainability agenda including ESD assessment tools like Green Star, carbon reduction through to social value. Our services are tailored to sustainable project delivery, with expert knowledge provided at every stage of the project lifecycle.

### **Building for our Future**

Regulation and rating systems, consumer expectations and investor demands, advancing technology and resource constraints are transforming what we build, where we build and how we build it.

The built environment sector is always focused on the future. But with the world's buildings responsible for nearly 40% of the world's carbon emissions, the future is sharply in focus.

As one of the world's oldest and largest quantity surveying firms, RLB knows that cost is just one measure of value. How we measure and manage carbon emissions, alongside other economic, environmental, health and wellbeing imperatives, is a global challenge.

RLB has established a global carbon policy that aligns our business with international targets set out in the Paris Agreement. We have committed to achieve net zero emissions by 2030 as a global business.

We have also established a suite of services to support our clients as we work together to drive down emissions and uncover new value.

### Sustainability Consultancy Services

RLB's sustainability consultancy service covers all cost aspects of the sustainability agenda including ESD assessment tools like Green Star, carbon reduction through to social value. Our services are tailored to sustainable project delivery, with expert knowledge provided at every stage of the project lifecycle.

RLB's approach is to identify key sustainability improvements and implement bespoke solutions that consider client goals and industry best practice, market drivers and potential legislative changes.

### Linking Carbon & Estimating

Measuring, mitigating, and managing climate change is the responsibility of every industry. But much of the heavy lifting will fall with high-emitting sectors, including the building and construction sector. With this comes the challenge of decarbonising supply chains, investigating R&D solutions, and effectively collaborating across the sector to better forecast and reduce climate-related risks.

Embodied carbon emissions – the emissions that are locked in as soon as a building comes out of the ground – are particularly hard to abate. Upfront emissions generated during manufacture, construction, transport, and demolition will constitute an estimated 85% of the industry's footprint by 2050.

RLB is helping our clients to quantify these hidden emissions with a methodology that assesses upfront embodied carbon impacts and offers concise, accurate and informative end-to-end advice across the building lifecycle.

### **Our Carbon Estimating Process**

RLB's carbon estimating process operates as a one-stop-shop. This end-to-end process eliminates the need for RLB to obtain solutions or advice from third-party suppliers and delivers high levels of transparency and quality to our clients from asset design to disposal.

### **OUR CARBON ESTIMATING PROCESS**

1. Initial

Establish initial upfront embodied carbon impact to inform and contribute to the client's aspirations

Complete carbon estimate assessment and pre-construction lifecycle assessment (LCA)

Undertake post-construction LCA including carbon neutral and Green Star Buildings certification

Provide carbon estimate assessments as the design develops, inclusive of strategic carbon pathways

Work with contractors and suppliers to achieve carbon neutral and Green Star Buildings targets

Implement and audit the Strategic Asset Management Plan (SAMP) of the building or portfolio on an ongoing basis until disposal

The following data represents estimates of current building costs in the respective market. Costs may vary as a consequence of factors such as site conditions, climatic conditions, standards of specification, market conditions etc.

Rates are in national currency per square metre of Gross Floor Area except as follows:

Chinese cities, Hong Kong and Macau: Rates are per square metre of Construction Floor Area, measured to outer face of external walls.

Singapore, Ho Chi Minh City, Jakarta and Kuala Lumpur: Rates are per square metre of Construction Floor Area, measured to outer face of external walls and inclusive of covered basement and above ground parking areas.

Chinese cities, Hong Kong, Macau and Singapore: All hotel rates are inclusive of Furniture Fittings and Equipment (FF&E).

#### CONSTRUCTION RATES

The following range of current building costs could be expected should tenders be called in the respective city. Items specifically included are those normally contained in a Building Contract.

Specific exclusions:

- Goods & Services Tax (GST)
- Land
- Legal and professional fees
- Loose furniture and fittings
- Site works and drainage
- Subdivisional partitions in office buildings
- Telstra and private telephone systems (PABX)
- Tenancy works

#### NOTES

i Car Parking costs have been excluded to arrive at the various building rates.

ii Refer to Page 19 for definitions.

ii The percentages shown against each building may be used to calculate the rate per Net Lettable Area.

Example: the NLA rate for a Premium Office CBD 10 to 25 Storeys would be calculated NLA rate = \$/M<sup>2</sup> ÷ efficiency percentage.

### **AUSTRALIAN CONSTRUCTION DEFINITIONS**

### CBD

Central Business District.

### **BUILDING WORKS**

Building works include substructure, structure, finishings, fittings, preliminary items, attendance and builder's work in connection with services.

### **BUILDING SERVICES**

Building services include special equipment, hydraulics, fire protection, mechanical, vertical transport, building management and electrical services.

### **OFFICE BUILDINGS**

**Premium offices** are based on landmark office buildings located in major CBD Office Markets, which are pacesetters in establishing rents.

**Grade A offices** are based on high quality buildings which are built for the middle range of the rental market.

(used as generic descriptions for Building Cost Ranges on page 16).

FOUR STAR	60-85 M <sup>2</sup>	35-45 M <sup>2</sup>	25-40 M <sup>2</sup>
THREE STAR	40-65 M <sup>2</sup>	30-40 M <sup>2</sup>	10-25 M <sup>2</sup>

Note: Public space includes service areas.

### CAR PARKS

Open Deck Multi-storey – minimal external walling.

Basement – CBD locations incur higher penalties for restricted sites and perimeter conditions.

### INDUSTRIAL BUILDINGS

Quality reflects a simplified type of construction suitable for light industry.

Exclusions: hardstandings, roadworks and special equipment.

#### AGED CARE

Single storey domestic construction with no operating theatre capacity, minimal specialist and service areas. 35-45 M2 GFA/bed (150 beds).

#### HOSPITAL

Low rise hospital (45-60 M2 GFA/Bed) - Minimal operating theatre capacity, specialist and service areas.

Low rise hospital (55–80 M2 GFA/Bed) - Major operating theatre capacity including extensive specialist and service areas.

Exclusions: Loose furniture, special medical equipment.

### **CINEMAS**

Multiplex Group Complex (warm shell). 2,000–4,000 seats.

Exclusions: Projection equipment, seating.

### SHOPPING CENTRES

**Department Store** Partially finished suspended ceilings and painted walls.

Exclusions: Floor finishes, shop fittings, etc.

**Supermarket/Variety Store** Fully finished and serviced space.

Exclusions: Cool rooms, shop fittings, refrigeration equipment, etc.

Malls Fully finished and serviced space.

Specialty Shops

Partially finished with ceilings, unpainted walls and power to perimeter point.

Exclusions: Floor finishes and shop fittings.

### SMALL SHOPS AND SHOWROOMS

Exclusions: Floor finishes, plumbing (other than hot and cold water to sink fittings in each shop) and shop fittings.

### RESIDENTIAL

Single Storey or 1-3 Storey Units reflect medium quality accommodation.

### **Multi-Storey**

Units reflect medium to luxury quality and air conditioned accommodation up to 80 storeys in height.

Note: the ratio of kitchen, laundry and bathroom areas to living areas considerably affects the cost range. Range given is significantly affected by the height and configuration of the building.

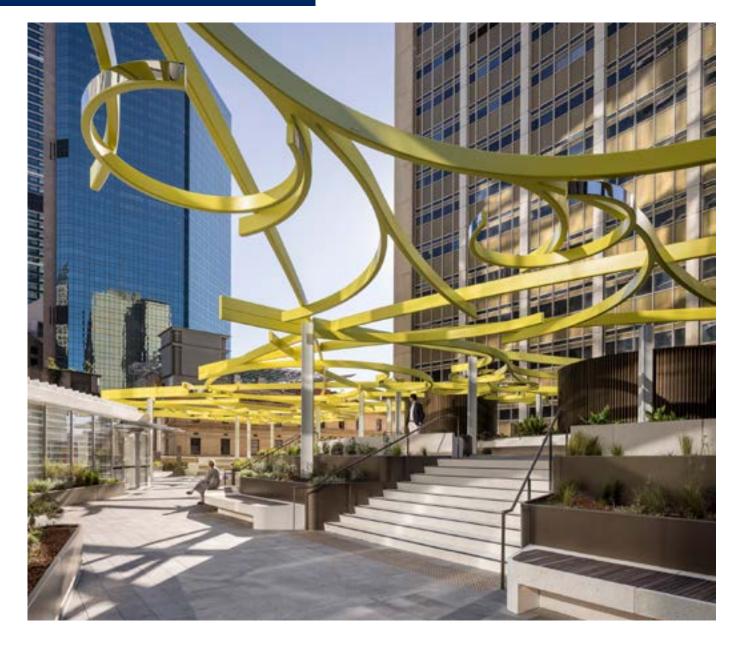

Exclusions: Loose furniture, special fittings, washing machines, dryers and refrigerators.

### **Rider Levett Bucknall** Award for Best Public Art Project 2023

The 2023 prize was presented to Dexus and Mirvac for commissioning a series of public art installations at the Quay Quarter redevelopment overlooking Sydney Harbour. The public art – which includes Roof for Stray Thoughts by Olafur Eliasson and Remembering Arabanoo by Jonathan Jones – enhances our experience of the city and our understanding of its complex history.

Remembering Arabanoo is a series of five installations that honour the memory of First Nations' man Arabanoo, who succumbed to smallpox following first contact with European settlers and was buried on the site of what is now Quay Quarter. One of the five artworks is Betūnigo, or oysters in the Eora language. Clusters of cast-bronze oysters, which encrust the sandstone wall of the Gallipoli Memorial Club, are carefully positioned at the high tide mark. The artwork reminds us of the countless generations who came before us; people who heaped oyster shells, century after century, to form the middens which were later ground down to create the lime mortar used in colonial buildings. Betūnigo adds physical and metaphorical layers to the public space.

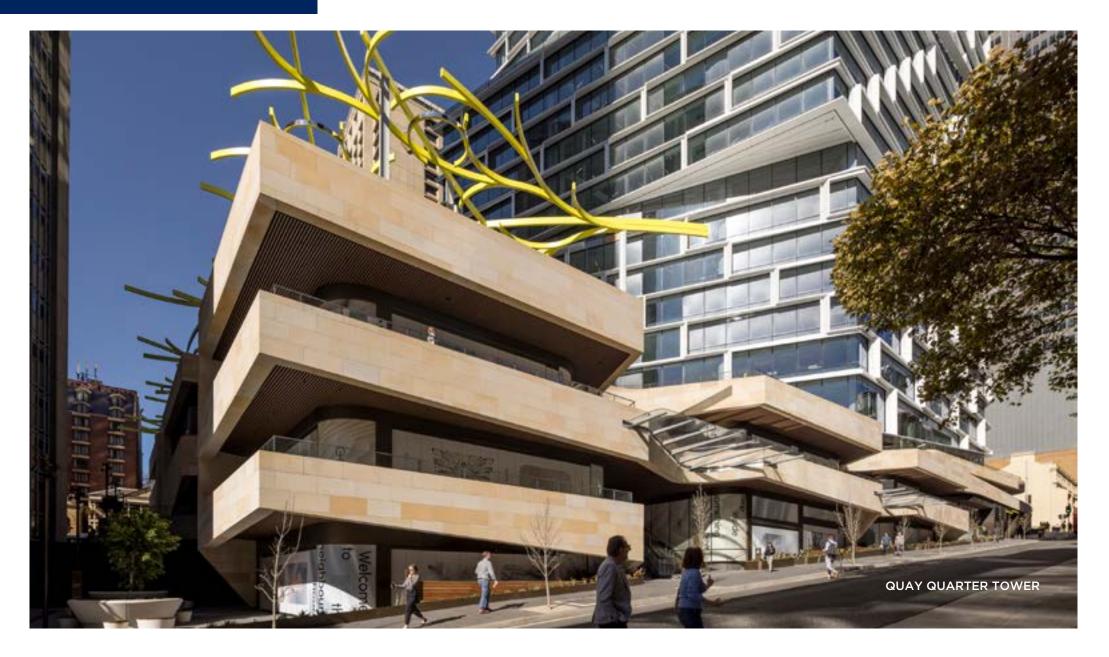

### **2023 WINNER**

### QUAY QUARTER TOWER

Roof for Stray Thoughts by Olafur Eliasson is a monumental yellow sculpture on the rooftop podium, while Remembering Arabanoo is five artworks embedded into the architecture of Quay Quarter Lanes by Wiradyuri/Kamilaroi artist Jonathan Jones.

### **2023 WINNER**

## ιι

This award recognises the use of public art within Australian developments to create brilliant spaces and, in turn, enrich and enliven our cities and suburbs.

"

### **32 SMITH SUBTRACTIVE WALL ART**

The GPT Group used this carved mural to celebrate the thriving culture of the Darug people, the Traditional Owners, of Parramatta. Darug woman and artist, Leanne Tobin, made the original sketches of people fishing, cooking and canoeing along the Parramatta River, and Di Emme transformed the sketches into a jack hammered bas-relief.

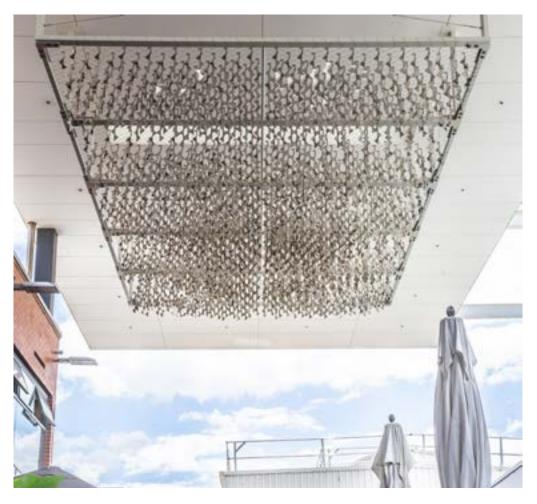

### ALL OUR BOYS

Located at the entrance to the Highline Development in Sydney's Westmead, the former site of St Vincent's Boys' Home, this artwork transforms the traditional, suburban gate with paper-like sheets of mirrored pillars that represent the boys who once lived there.

### **BURWOOD BRICKWORKS**

Frasers Property commissioned Indigenous artist Mandy Nicholson to create a striking artwork spanning 1,700 sqm across the ceiling and façade of the shopping centre, connecting the site to its traditional heritage and reminding visitors of the depth of Wurundjeri culture.

### CHANDELIER LANE

This immersive kinetic installation by Office Feuerman in the new Eat Street in Stockland Wetherill Park reappropriates the domestic and cultural symbol of the chandelier that lights many meals shared between families and friends.

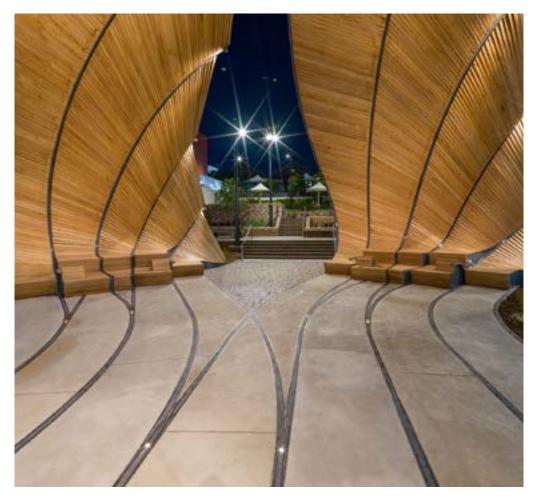

### FISHERMAN'S BEND

George Rose's mural depicts a topographical map of Fishermans Bend before the Yarra River's redirection in 1857. Colourful lines represent the natural systems of the land and the rich cultural history of the people who lived there.

### **GREETINGS, FLOWERS, PING PONG 1000**

These three major public art components at Sydney's Ed.Square reinforce identity and belonging. For instance, Ping Pong 1000 is a playful representation of an endless table tennis tournament.

### INTERCHANGE PAVILION

Mirvac and artist Chris Fox celebrate the bustling railway workshops once at the heart of South Eveleigh. Visitors are drawn into the Pavilion by railway switch tracks; inside, timber seats rise around a stage that is perfect for planned events or a quick bite.

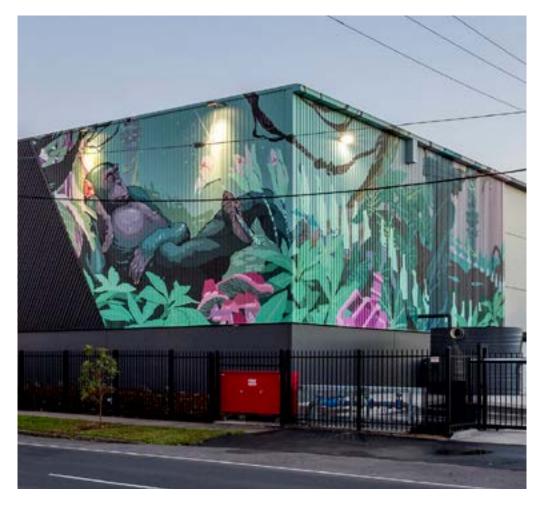

### RESOURCES

This eight-by-38-metre mural by Casey Coolwell-Fisher, a Quandamooka Nunukul woman of Minjerribah, represents the Albert River, and greets shoppers at their local Woolworths supermarket.

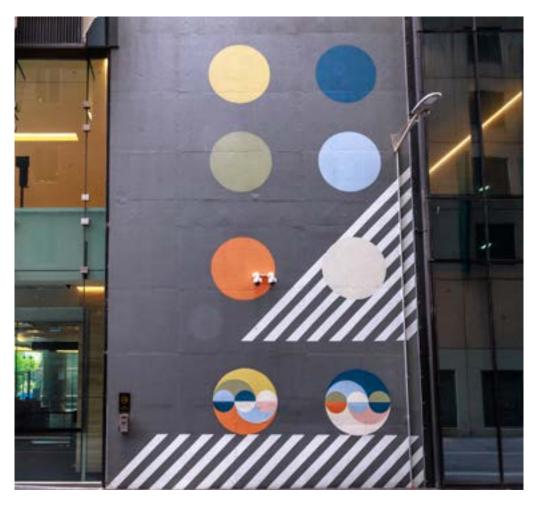

### **TO DANCE - WAKAKIRRA**

TAFE NSW commissions local Indigenous artists from each community to create, share and install their artworks at each connected learning centre around the state.

### VISY GLASS MURALS

Uniquely designed murals of magnificent scale from celebrated street artists Kitt Bennett and Georgia Hill pays homage to the history and industrial heritage of the Melbourne suburb of Spotswood, with modern elements a nod to the future.

### WESLEY PUBLIC ART PROJECT

Commissioned by Charter Hall, this \$1.5 million investment brings together six leading Australian artists to achieve a thought-provoking and engaging art experience through the 1-hectare precinct.

#### LANDSCAPING

	LOW	HIGH	PER
LIGHT LANDSCAPING TO LARGE AREAS WITH MINIMAL PLANTING AND SITE FORMATION BUT EXCLUDING TOPSOIL AND GRASSING	38,500	55,000	HECTARE
DENSE LANDSCAPING AROUND BUILDINGS INCLUDING SHRUBS, PLANTS, TOPSOIL AND GRASSING	70	135	M <sup>2</sup>
GRASSING ONLY TO LARGE AREAS INCLUDING TOPSOIL, SOWING AND TREATING	25	45	M <sup>2</sup>

### **CAR PARKS - ON GROUND**

Based on 30 M<sup>2</sup> overall area per car with asphalt paving including sub base and sealing.

	LOW	HIGH	PER
LIGHT DUTY PAVING.	3,000	3,200	CARSPACE
HEAVY DUTY PAVING TO FACTORY TYPE COMPLEX, LARGE AREA WITH MINIMAL SITE FORMATION, DRAINAGE AND KERB TREATMENT	3,600	4,500	CARSPACE
LIGHT DUTY PAVING TO SHOPPING CENTRE COMPLEX, LARGE AREA WITH MINIMAL SITE FORMATION, AND INCLUDING DRAINAGE AND KERB TREATMENT	3,800	4,250	CARSPACE

### ROADS

Asphalt finish including kerb, channel and drainage.

	LOW	HIGH	PER
RESIDENTIAL ESTATE 6.80 METRES WIDE EXCLUDING FOOT PATH AND NATURE STRIP	1,400	1,860	М
INDUSTRIAL ESTATE 10.4 METRES WIDE INCLUDING MINIMAL TO EXTENSIVE FORMATION	2,150	2,850	М

### ADELAIDE CONSTRUCTION DEMOLITION COSTS

Demolition costs include grubbing up footings, sealing services, temporary shoring, supports, removal of demolished materials, rubbish and site debris.

Exclusions: work carried out outside normal working hours, credit value of demolished materials and restricted site conditions.

BUILDING TYPE	LOW	HIGH	PER
SINGLE STOREY TIMBER FRAMED HOUSE WITH TIMBER CLADDING AND TILED ROOF	75	150	M <sup>2</sup>
SINGLE/DOUBLE STOREY BRICK HOUSE WITH TILED ROOF	85	170	M <sup>2</sup>
SINGLE STOREY FACTORY/WAREHOUSE WITH REINFORCED CONCRETE GROUND SLAB, TIMBER OR STEEL FRAMED WALLS			
• METAL CLAD	75	110	$M^2$
BRICK CLAD	90	135	$M^2$
TWO STOREY OFFICE BUILDING WITH REINFORCED CONCRETE FRAME MASONRY CLADDING AND METAL ROOF	125	175	$M^2$
MULTI-STOREY OFFICE BUILDING UP TO 15 FLOORS WITH MASONRY CLADDING			
REINFORCED CONCRETE	225	390	$M^2$
STRUCTURAL STEEL	290	410	$M^2$
MULTI-STOREY OFFICE BUILDING UP TO 25 STOREYS, CONSTRUCTED OF STEEL FRAME WITH MASONRY CLADDING	350	450	$M^2$

### HOTEL FURNITURE, FITTINGS & EQUIPMENT COSTS

The cost of hotel furniture, fittings and equipment (FF&E) varies within a wide range and is dependent on the quality of items provided. The following gives the expected cost ranges for different rating hotels. These costs include fitting out public areas.

	LOW	HIGH	PER
FIVE STAR RATING	46,750	88,000	BEDROOM
FOUR STAR RATING	31,500	49,500	BEDROOM
THREE STAR RATING	27,250	47,500	BEDROOM

### ADELAIDE CONSTRUCTION OFFICE FITOUT COSTS

The following costs, which include workstations, are an indication of those currently achievable for good quality office accommodation, inclusive of all loose and fixed furniture.

TYPE OF TENANCY	OP PLAN		FUI PARTIT		PER
	LOW	HIGH	LOW	HIGH	
INSURANCE OFFICES, GOVERNMENT DEPARTMENT	1,500	2,000	2,100	2,500	$M^2$
MAJOR COMPANY HEADQUARTERS	1,900	2,600	2,400	3,400	$M^2$
SOLICITORS, FINANCIERS	1,900	2,600	2,400	3,400	$M^2$
EXECUTIVE AREAS AND FRONT OF HOUSE	-	-	5,500	6,500	$M^2$
COMPUTER AREAS	2,400	4,900	-	-	$M^2$

Computer areas include access flooring and additional services costs but exclude computer equipment.

### WORKSTATIONS

Fully self-contained workstation module size 1,800 x 1,800 MM including screens generally 1,220 MM high (managerial 1,620 MM high), desks, storage cupboards, shelving.

TYPE OF WORKSTATION	LOW	HIGH	PER
CALL CENTRE	1,760	2,750	EACH
SECRETARIAL	2,450	3,500	EACH
TECHNICAL STAFF	2,200	3,500	EACH
EXECUTIVE	4,300	6,500	EACH

### REFURBISHMENT

### Office

The following refurbishment costs include for demolition and removal of partitions and internal finishes, provide new floor, ceiling and wall finishes, but excluding fitting out and removal of asbestos and upgrading of building for GreenStar ratings. The lower end of the range indicates re-use and modification of existing specialist building services, while the upper end of the range indicates complete replacement of equipment and accessories.

	LOW	HIGH	PER
CBD OFFICES TYPICAL FLOOR	1,200	2,100	$M^2$
CBD OFFICES CORE UPGRADE (EXCLUDING LIFTS MODERNISATION)	1,500	3,000	$M^2$

### ADELAIDE CONSTRUCTION RECREATIONAL FACILITIES COSTS

### **BASKETBALL CENTRE**

	LOW	HIGH	PER
CONSISTING OF BRICK WALLS, STEEL PORTAL FRAME AND PURLINS WITH METAL ROOF, TIMBER FLOOR TO PLAYING AREA, PUBLIC SEATING, PUBLIC TOILETS AND CHANGE ROOMS	3,500	4,500	M <sup>2</sup>

#### SWIMMING POOL CENTRES

	LOW	HIGH	PER
INCLUDING FOYER, KIOSK, OFFICE, LOCKERS, ADMINISTRATION OFFICES, CHANGE ROOMS	5,500	6,500	M <sup>2</sup>

### SWIMMING POOLS

High quality fully tiled including drainage and filtration but excluding surrounding paving and enclosures.

	LOW	HIGH	PER
HALF OLYMPIC (25.0 X 12.5 M)	2,500,000	3,000,000	EACH
EXTRA FOR HEATING	100,000	150,000	EACH
EXTRA OVER FILTRATION AND DOSING PLANT FOR OZONE BASED DOSING SYSTEM	150,000	200,000	EACH
EXTRA FOR WET DECK	55,000	85,000	EACH
OLYMPIC (50.0 X 21.5 M)	5,800,000	6,500,000	EACH
EXTRA FOR HEATING	175,000	275,000	EACH
EXTRA FOR FILTRATION AND DOSING PLANT	300,000	500,000	EACH
EXTRA OVER FILTRATION AND DOSING PLANT FOR OZONE BASED DOSING SYSTEM	200,000	300,000	EACH

### SMALL BOAT AND YACHT MARINA BERTHS

Floating pontoon walk-ways, serviced with power and water.

	LOW	HIGH	PER
DOUBLE LOADED BERTHS	20,000	38,500	BERTH
SINGLE LOADED BERTHS	33,000	49,500	BERTH
SUPER YACHTS	220,000	275,000	BERTH

### **TENNIS COURTS**

Six courts with minimal site formation and including sub base playing surface, chainwire fence 3.60 M high and spoon drains.

	LOW	HIGH	PER
SYNTHETIC GRASS	66,000	77,000	COURT
RED POROUS (EN-TOUT-CAS)	31,500	38,500	COURT
SYNTHETIC ACRYLIC (FLEXIPAVE)	42,000	55,000	COURT
ASPHALT (5MM)	34,750	49,500	COURT
REBOUND ACE	94,000	105,000	COURT
PLEXICUSHION	-	-	COURT
CONCRETE	39,750	53,000	COURT
FLOODLIGHTING	15,000	25,000	COURT

### **GOLF COURSES**

18 hole championship course including siteworks, finishing works, irrigation, grassing, landscaping, green keeping, plant and equipment, course furniture and groundstaff to practical completion but excluding mains water supply to course, roads, carparks and clubhouse. The following are indicative costs only.

	LOW	HIGH	PER
SANDY SOIL SITE, REQUIRING MINIMAL EXCAVATION AND SITE PREPARATION	7,700,000	11,000,000	COURSE

EXCLUDES SPRINKLERS	40	150	$M^2$

### GRANDSTANDS

Prestige metropolitan grandstand with a high standard of finishes and facilities including bars, stores, meeting/change rooms, dining and kitchen area.

	LOW	HIGH	PER
GRANDSTAND	5,500	10,500	SEAT

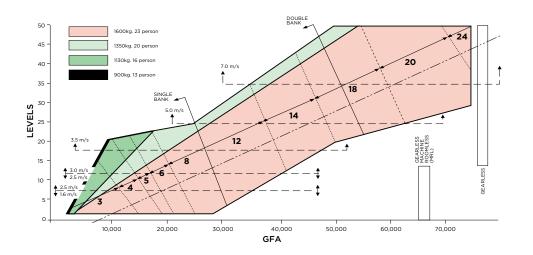

### ADELAIDE CONSTRUCTION VERTICAL TRANSPORTATION

### LIFT SELECTION CHART

To calculate the number and type of lifts:

- Locate a point on the graph by using the GFA in M<sup>2</sup> shown on the bottom axis and number of levels on the left axis.
- The colour at the intersection point indicates the lift capacity, the horizontal lines the lift speed and the angled lines the number of lifts and the number of banks.
- By extending the horizontal line to the far right hand side, the type of lift required can be obtained.

Destination control is a optional lift control system in which passengers key-in the number of their destination floor at a button panel located in their current lift lobby area. Each floor lobby has a button panel. The lifts cars themselves do not have destination buttons and are designated to serve the floors as required. Destination control will generally boost the "Up peak" or morning performance of the lift system and will provide additional security provisions. The performance of the lift system during lunch times and at the end of the day is generally not improved with this control system. Lobby area may need to be increased.

# ADELAIDE DEVELOPMENT STAMP DUTIES

Land holder duty is imposed and collected in South Australia in accordance with the provisions of the SDA and the Taxation Administration Act 1996 (the "TAA").

Only conveyances or transfers of an interest in residential and primary production land are liable for duty.

No liability to duty arises in relation to a conveyance in non-residential and non-primary production land executed on or after 1 July 2018.

Foreign purchasers that acquire residential property in South Australia will be required to pay a surcharge of 7% of the dutiable value of the property. This surcharge amount is in addition to the duty that is otherwise payable.

The foreign ownership surcharge applies to transactions liable to duty entered into from 1 January 2018 and is payable in addition to the landholder duty that is otherwise payable.

VALUE OF NON QUALIFYING LAND	AMOUNT OF DUTY @ 1/7/23
\$0 - \$12,000	\$1.00 FOR EVERY \$100 OR PART OF \$100
\$12,001 -\$30,000	\$120 PLUS \$2.00 FOR EVERY \$100 OR PART OF \$100 OVER \$12,000
\$30,001 -\$50,000	\$480 PLUS \$3.00 FOR EVERY \$100 OR PART OF \$100 OVER \$30,000
\$50,001 - \$100,000	\$1,080 PLUS \$3.50 FOR EVERY \$100 OR PART OF \$100 OVER \$50,000
\$100,001 - \$200,000	\$2,830 PLUS \$4.00 FOR EVERY \$100 OR PART OF \$100 OVER \$100,000
\$200,001 - \$250,000	\$6,830 PLUS \$4.25 FOR EVERY \$100 OR PART OF \$100 OVER \$200,000
\$250,001 - \$300,000	\$8,955 PLUS \$4.75 FOR EVERY \$100 OR PART OF \$100 OVER \$250,000
\$300,001 - \$500,000	\$11,330 PLUS \$5.00 FOR EVERY \$100 OR PART OF \$100 OVER \$300,000
\$500,001 +	\$21,330 PLUS \$5.50 FOR EVERY \$100 OR PART OF \$100 OVER \$500,000

# ADELAIDE DEVELOPMENT LAND TAX

Land ownership, site value and land use as at midnight 30 June each year is used to determine the land tax for the forthcoming financial year. Land tax revenue assists in the provision of public services such as education, health and public safety.

Revenue SA is responsible for the collection of land tax under the Land Tax Act 1936, the Taxation Administration Act 1996 and associated Regulations.

TOTAL UNIMPROVED VALUE OF LAND - GENERAL RATE	2023-24 TAX RATES
UP TO \$668,000	NIL
\$668,000 TO \$1,073,000	\$0.50 FOR EVERY \$100 OR PART OF \$100 ABOVE \$668,000
\$1,073,000 TO \$1,561,000	\$2,025 PLUS \$1.00 FOR EVERY \$100 OR PART OF \$100 ABOVE \$1,073,000
\$1,561,000 TO \$2,500,000	\$6,905 PLUS \$2.00 FOR EVERY \$100 OR PART OF \$100 ABOVE \$1,561,000
OVER \$2,500,000	\$25,685 PLUS \$2.40 FOR EVERY \$100 OR PART OF \$100 ABOVE \$2,500,000

From the 2023-24 financial year, a higher rate of land tax and a lower land tax threshold will apply to land owned by trusts

TOTAL UNIMPROVED VALUE OF LAND - TRUST RATE	2023-24 TAX RATES
UP TO \$25,000	NIL
\$25,000 TO \$668,000	\$125 PLUS \$0.50 FOR EVERY \$100 OR PART OF \$100 ABOVE \$25,000
\$668,000 TO \$1,073,000	\$3,340 PLUS \$1.00 FOR EVERY \$100 OR PART OF \$100 ABOVE \$668,000
\$1,073,000 TO \$1,561,000	\$7,390 PLUS \$2.40 FOR EVERY \$100 OR PART OF \$100 ABOVE \$1,073,000
\$1,561,000 TO \$2,500,000	\$14,710 PLUS \$2.40 FOR EVERY \$100 OR PART OF \$100 ABOVE \$1,561,000
OVER \$2,500,000	\$37,246 PLUS \$2.40 FOR EVERY \$100 OR PART OF \$100 ABOVE \$2,500,000

Land which is eligible for an exemption or exclusion from land tax (for example, a principal place of residence, land used for primary production, etc.) continues to be exempt from land tax for certain types of trusts and individuals.

For further details refer to www.revenuesa.sa.gov.au

### ADELAIDE DEVELOPMENT PLANNING – CAR PARKING

Car parking for the City of Adelaide should be provided in accordance with The Adelaide City Planning and Design Code (Version 2022.22), Part 4, Table 1 General Off- Street Car Parking Requirements, consolidated 24th November 2022. The table below summarises parking requirements under the Plan.

### Full details are available from https://plan.sa.gov.au/

TYPE OF PROPOSED USE	CAR PARKING RATE (UNLESS VARIED BY TABLE 2)
HOSPITAL	4.5 SPACES PER BED FOR A PUBLIC HOSPITAL.
HUSPITAL	1.5 SPACES PER BED FOR A PRIVATE HOSPITAL.
HOTEL	1 SPACE FOR EVERY 2 M <sup>2</sup> OF TOTAL FLOOR AREA IN A PUBLIC BAR PLUS 1 SPACE FOR EVERY 6 M <sup>2</sup> OF TOTAL FLOOR AREA AVAILABLE FOR IN A LOUNGE, BEER GARDEN PLUS 1 SPACE PER 2 GAMING MACHINES, PLUS 1 SPACE PER 3 SEATS IN A RESTAURANT.
OFFICES	4 SPACES PER 100 M <sup>2</sup> OF GROSS LEASABLE FLOOR AREA.
DETACHED DWELLING	1 SPACE FOR DWELLINGS WITH 1 BED.
DETACHED DWELLING	2 SPACES FOR DWELLINGS WITH 2 OR MORE BEDROOMS, 1 OF WHICH IS TO BE COVERED.
	1 SPACE PER DWELLING FOR WITH 1 OR 2 BEDROOMS (INCLUDING ROOMS CAPABLE OF BEING USED AS A BEDROOM).
GROUP DWELLING/ RESIDENTIAL FLAT BUIL DING	2 SPACES PER DWELLING, 1 OF WHICH TO BE COVERED FOR DWELLINGS WITH 3 OR MORE BEDROOMS.
	0.33 SPACES PER DWELLING FOR VISITOR PARKING WHERE DEVELOPMENT INVOLVES 3 OR MORE DWELLINGS.
WAREHOUSE	0.5 SPACES PER 100 M <sup>2</sup> TOTAL FLOOR AREA
TOURIST ACCOMODATION	1 SPACE PER ACCOMODATION UNIT / GUEST ROOM

### ADELAIDE DEVELOPMENT RLB CONSTRUCTION MARKET ACTIVITY CYCLE

Activity within the construction industry traditionally has been subject to volatile cyclical fluctuations. The RLB Construction Market Activity Cycle (cycle) is a representation of the development activity cycle for the construction industry within the general economy.

Within the general construction industry, RLB considers seven sectors to be representative of the industry as a whole.

Each sector is assessed as to which of the three zones (peak, mid or trough) best represents the current status of that sector within the cycle, then further refined by identifying whether the current status is in a growth or a decline phase.

The 'up' and 'down' arrows within the table represent whether the sector is in a growth or decline phase with the colour of the arrow determining the zone within the cycle.

Labour and Materials Trade Ratios	47
Progress Payment Claims	47
Common Industry Acronyms	48
Method of Measurement	48

# **BENCHMARKS REGIONAL INDICES**

The construction cost information in this publication is based upon rates for capital city construction projects and are current for the Fourth Quarter 2023. For towns or cities outside capital cities, costs can be expected to vary in accordance with the following table of indices:

NEW SOUTH WALES		QUEENSLAND	QUEENSLAND		WESTERN AUSTRALIA	
SYDNEY	100	BRISBANE	100	PERTH	100	
ARMIDALE	105	CAIRNS	112	ALBANY	120	
COFFS HARBOUR	100	GLADSTONE	120	BROOME	145	
NEWCASTLE	99	GOLD COAST	100	BUNBURY	105	
ORANGE	106	MACKAY	120	CARNARVON	140	
TAMWORTH	102	SUNSHINE COAST	100	ESPERANCE	125	
WAGGA WAGGA	106	TOWNSVILLE	110	GERALDTON	108	
WOLLONGONG	100			KALGOORLIE	140	
				KUNUNURRA	160	
				PORT HEDLAND	170	
				TOM PRICE	165	

The above table should be used only as a comparative guide, and is only appropriate for the urban precincts nominated and for the larger commercial projects.

Care must be taken to review specific local market conditions within the anticipated time frame of a project's development period before establishing and committing viable budgets for projects.

In the event that projects are required to be constructed in remote locations or in areas without urban infrastructure, then special consideration must be given to the budget structure of these projects. Each project must be considered in detail and its specific resource requirements assessed and sourced to establish budget costs.

RLB recommend that advice on local market conditions be sought from our regional offices when initial project budgets and feasibility studies are in the process of establishment. Our regional offices are identified on page 104.

# BENCHMARKS KEY CITY RELATIVITIES – Q4 2023

RLB's Key City Relativity Matrix highlights the cost relativity between key Australian cities. The Relativity Matrix compares the general cost of building between cities. Each column represents a base city indexed to 100 with other city's relativities re-indexed to that base city.

In order to calculate the relativity between different cities, the difference can be calculated using the following formula:

where:

 $Ccc = Bcc \times (\frac{Cr}{Ch})^{-1}$ 

CCC = COMPARED CITY COST BCC = BASE CITY COST CR = RELATIVITY OF COMPARED CITY CB = RELATIVITY OF BASE CITY

For example, when comparing costs between Sydney (base city) and Perth (compared city), Sydney building costs are generally 10% more than Perth i.e. (100/91) and Perth is 9% cheaper than Sydney i.e. (100/109).

If the tendered price of a building in Sydney was \$1,000,000, the equivalent cost in Perth would be \$910,000 i.e.  $(1,000,000 \times (100/91)^{-1}$  and conversely a \$1,000,000 building in Perth would cost \$1,090,000 in Sydney, i.e. 1,000,000  $\times (100/109)^{-1}$

### BENCHMARKS OFFICE BUILDING EFFICIENCIES

The efficiency of an office building is expressed as a percentage of the Net Lettable Area (NLA) to the Gross Floor Area (GFA). The table below indicates that relationship to the GFA of the whole building both with car parks and basements included and excluded, that could be expected for an average project in the nominated category. Also shown is the average net to gross efficiency of the office floors only in each of the eight building types listed below.

	EFFICIENCY						
	BASEMENTS AI	BASEMENTS AND CAR PARKS					
TYPE OF CBD OFFICE BUILDING	INCLUDED	EXCLUDED	OFFICE FLOORS %				
PRESTIGE							
10 TO 25 STOREYS	63-68	75-80	85-90				
25 TO 40 STOREYS	58-63	70-75	80-85				
40 TO 55 STOREYS	53-58	68-73	75-80				
INVESTMENT							
UP TO 10 STOREYS	69-74	81-85	86-91				
10 TO 25 STOREYS	64-69	76-81	81-86				
25 TO 40 STOREYS	59-64	71-76	76-81				
INVESTMENT, OTHER T	HAN						
UP TO 10 STOREYS	70-75	82-86	87-92				
10 TO 25 STOREYS	65-70	77-82	82-87				

# **REINFORCEMENT RATIOS**

The following ratios give an indication of the average weight of reinforcement per cubic metre of concrete for the listed elements. Differing structural systems and sizes of individual elements and grid sizes will cause considerable variation to the stated ratios. For project specific ratios a structural engineer should be consulted.

	AVE KG/M <sup>3</sup>		AVE KG/M <sup>3</sup>
STRIP FOOTINGS	50	STRAP BEAMS	120
COLUMN BASES	40	SLAB ON GROUND	40
PILE CAPS	50	SUSPENDED SLABS 100-150 MM ONE AND TWO WAY	90
BORED PIER	90	250 MM FLAT PLATE	120
RAFT FOUNDATION	70	250 MM WAFFLE	160
PEDESTAL & STUB COLUMNS	240	COLUMNS	240
RETAINING WALLS			
1-2 STOREY	70	BEAMS	170
2-3 STOREY	120		
GROUND BEAMS	120	WALLS (CORE)	140
		STAIRS	80

# PLANT ROOM SPACE

Generally plant room space represents 6–11% of the GFA of a multi-storey office building.

### BENCHMARKS LABOUR AND MATERIALS TRADE RATIOS

The following represents the ratio of on-site labour to material for various trades and sub-trades based upon our own survey.

The figures are relevant to all works constructed by traditional methods; variations to these methods will change the ratios, i.e. on-site fabrication of items traditionally factory fabricated such as joinery fittings, metalwork items, etc.

PRELIMINARIES	40 10 50
DEMOLISHER	85 15

# **BENCHMARKS METHOD OF** MEASUREMENT OF BUILDING AREAS

The rules for measurement of building areas are defined by the Australian Institute of Quantity Surveyors and the Australian Institute of Architects.

The definitions are as follows: Unit of measurement: square metres  $(M^2)$ .

#### **GROSS FLOOR AREA (GFA)**

The sum of the "Fully Enclosed Covered Area" and "Unenclosed Covered Area" as defined.

#### FULLY ENCLOSED COVERED AREA (FECA)

The sum of all such areas at all building floor levels, including basements (except unexcavated portions), floored roof spaces and attics, garages, penthouses, enclosed porches and attached enclosed covered ways alongside buildings, equipment rooms, lift shafts, vertical ducts, staircases and any other fully enclosed spaces and usable areas of the building, computed by measuring from the normal inside face of exterior walls but ignoring any projections such as plinths, columns, piers and the like which project from the normal inside face of exterior walls. It shall not include open courts, lightwells, connecting or isolated covered ways and net open areas or upper portions of rooms, lobbies, halls, interstitial spaces and the like which extend through the storey being computed.

#### UNENCLOSED COVERED AREA (UCA)

The sum of all such areas at all building floor levels, including roofed balconies, open verandahs, porches and porticos, attached open covered ways alongside buildings, undercrofts and usable space under buildings, unenclosed access galleries (including ground floor) and any other trafficable covered areas of the building which are not totally enclosed by full height walls, computed by measuring the area between the enclosing walls or balustrade (ie. from the inside face of the UCA excluding the wall or balustrade thickness). When the covering element (ie. roof or upper floor) is supported by columns, is cantilevered or is suspended, or any combination of these, the measurements shall be taken to the edge of the paving or to the edge of the cover, whichever is the lesser. UCA shall not include eaves overhangs, sun shading, awnings and the like where these do not relate to the clearly defined trafficable areas, nor shall it include connecting or isolated covered ways.

## BENCHMARKS METHOD OF MEASUREMENT OF BUILDING AREAS

#### **BUILDING AREA (BA)**

The total enclosed and unenclosed area of the building at all building floor levels measured between the normal outside face of any enclosing walls, balustrades and supports.

#### USABLE FLOOR AREA (UFA)

The sum of the floor areas measured at floor level from the general inside face of walls of all interior spaces related to the primary function of the building. This will normally be computed by calculating the "Fully Enclosed Covered Area" (FECA) and deducting all the following areas supplementary to the primary function of the building:

#### Deductions

(a) Common Use Areas

- (b) Service Areas
- (c) Non-Habitable Areas

#### NET LETTABLE AREA (NLA)

#### Application

Calculating tenancy areas in office buildings and office & business parks.

#### Definition

- 3.1 The net lettable area of a building is the sum of its whole floor lettable areas.
- 3.2 Net Lettable Area Whole Floors

The whole floor net lettable area is calculated by:

- 3.2.1 taking measurements from the internal finished surfaces of permanent vinternal walls and the internal finished surfaces of dominant portions of the permanent outer building walls
- 3.2.2 included in the lettable area calculation are:
  - 3.2.2.1 window mullions
  - 3.2.2.2 window frames
  - 3.2.2.3 structural columns
  - 3.2.2.4 engaged perimeter columns or piers
  - 3.2.2.5 fire hose reels attached to walls
  - 3.2.2.6 additional facilities specially constructed for or used by individual tenants that are not covered in section 3.2.3

- 3.2.3 excluded from the lettable area of each tenancy are:
  - 3.2.3.1 stairs, accessways, fire stairs, toilets, recessed doorways, cupboards, telecommunication cupboards, fire hose reel cupboards, lift shafts, escalators, smoke lobbies, plant/motor rooms, tea rooms and other service areas, where all are provided as standard facilities in the building
  - 3.2.3.2 lift lobbies where lifts face other lifts, blank walls or areas listed in section 3.2.3.1 above
  - 3.2.3.3 areas set aside for the provision of all services, such as electrical or telephone ducts and air conditioning risers to the floor, where such facilities are standard facilities in the building
  - 3.2.3.4 area dedicated as public spaces or thoroughfares such as foyers, atria and accessways in lift and building service areas
  - 3.2.3.5 areas and accessways set aside for use by service vehicles and for delivery of goods, where such areas are not for the exclusive use of occupiers of the floor or building
  - 3.2.3.6 areas and accessways set aside for car parking
  - 3.2.3.7 areas where there is less than 1.5 metre height clearance above floor level – these spaces should be measured and recorded separately
- 3.3 Net Lettable Area (NLA) Sub Divided Floors Follow 3.2 but measure to the centre line of inter-tenancy walls or partitions except where the walls or partitions adjoin public areas, such as lobbies and corridors, in which case measure to the line of the dominant portion of their public area faces.
- 3.4 Treatment of Balconies, Verandahs etc. Balconies, terraces, planter boxes, verandahs, awnings and covered areas should be excluded from tenancy area calculations, but may be separately identified for the purpose of negotiating rentals.

Areas should be measured to the inside face of the enclosing walls or structures. The outer edge of the awning or covered area is the defined edge.

# ASSETS AND FACILITIES

Sustainability and Quality	51
Management Standards	52
Useful Life Analysis	52
Outgoings	53
Essential Safety Measures	53
Capital Allowances (Tax Depreciation)	54

Through the Rider Levett Bucknall | Life suite of services, we are able to provide meaningful, practical, commercial advice to clients in the delivery of sustainable and economically responsible projects.

The services help building owners understand the life value and expectancy of their buildings' whole life costs and provide options to extend the useful life of buildings and maintain quality.

# ASSETS AND FACILITIES SUSTAINABILITY AND QUALITY

Sustainability is concerned with improving the quality of life while living within the carrying capacity of supporting ecosystems. The planning, delivering and managing of our Built Environment requires a balance between environmental, economic and social factors.

The provision of a more productive, sustainable and liveable Built Environment is best considered in collaboration with all the stakeholders, including owners, managers and tenants. This process should include not only the review of sustainability objectives and initiatives, but address functional requirements and whole of life costings along with the implementation of facilities planning and asset management strategies. Rating systems developed to assist with performance benchmarking within Australia include:

**Green Star** – The Green Building Council of Australia's (GBCA) six star environmental rating system evaluates: communities, design, as-built of buildings, interiors, building performance in terms of energy and water efficiency, indoor environmental quality and resource conservation.

#### NABERS - National Australian Built Environment Rating

System is a national program managed by the NSW Department of Environment and Heritage. NABERS measures the environmental performance of Australian offices, tenancies, shopping centres, hotels, data centers and homes. There are NABERS tools for energy efficiency, water usage, waste management and indoor environment quality. Additionally, a NABERS Energy rating forms part of the Building Energy Efficiency Certificate (BEEC) requirement under the Commercial Building Disclosure (CBD) program. The CBD Program requires most sellers and lessors of office space of 2,000 M2 or more to have an up-to-date Building Energy Efficiency Certificate (BEEC).

**IS** - The Infrastructure Sustainability Council of Australia's (ISCA) Infrastructure Sustainability (IS) rating scheme. IS is Australia's only comprehensive rating system for evaluating sustainability across design, construction and operation of infrastructure. IS evaluates the sustainability (including environmental, social, economic and governance aspects) of infrastructure projects and assets including transport, energy, water and communications sectors.

**Quality** – Property Council of Australia's (PCA) "a Guide to Office Building Quality" (2006, 2012), provides separate tools for assessing office building quality in new and existing buildings. The tools provide a guide to parameters that typically influence building quality. They offer a voluntary, market-based approach to classifying building characteristics and performance. The 2nd edition of the guide took effect on 1 January 2012 and includes expanded environmental performance criteria for Energy, Water, Waste and Indoor Environment. Additionally, the Building Management criteria was expanded to include Level of Service, Energy and Water Sub-Metering and Life Cycle/Maintenance Plan requirements.

**RLB** have staff accredited in the use of Green Star, NABERS, along with access to LEED, BREEAM, GreenMark and other international standards.

**RLB** also provides Building Quality Assessment (BQA) services for PCA Quality gradings.

### ASSETS AND FACILITIES MANAGEMENT STANDARDS

Since late 2012 Standards Australia, supported by FMA Australia, PCA, RICS, SBEnrc, TEFMA and other industry bodies, have been involved with the ISO's international Facilities Management (FM) standards initiative.

ISO 41001:2018 specifies the requirements for a facility management (FM) system when an organization:

- a) needs to demonstrate effective and efficient delivery of FM that supports the objectives of the demand organization
- b) aims to consistently meet the needs of interested parties and applicable requirements
- c) aims to be sustainable in a globally-competitive environment

The requirements specified in ISO 41001:2018 are non-sector specific and intended to be applicable to all organizations, or parts thereof, whether public or private sector, and regardless of the type, size and nature of the organization or geographical location.

Separately, there was the release in 2014 of the ISO 55000 series for Asset Management (AM). ISO 55000 specifies the requirements for the establishment, implementation, maintenance and improvement of a management system for asset management, referred to as an "asset management system" for those wishing to:

- improve the realisation of value for their organization from their asset base
- be involved in the establishment, implementation, maintenance and improvement of an asset management system
- be involved in the planning, design, implementation and review of asset management activities along with service providers

Meanwhile, FMA Australia's local efforts include "An Operational Guide to Sustainable Facilities Management" (2010) – a practical document that provides technical guidance in achieving a more sustainable FM approach in an Australian context.

RLB can provide strategic advisory and technical support across the latest in AM and FM practices.

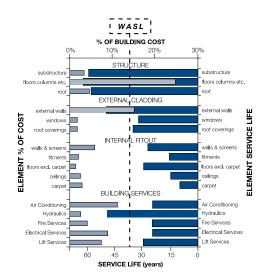

### ASSETS AND FACILITIES USEFUL LIFE ANALYSIS

### LIFE CYCLE ANALYSIS

Life Cycle Studies recognise that every 'whole' asset consists of many component parts, each with its own life expectancy, interrelationships, resulting quality and maintenance issues. However, in addition to physical obsolescence, useful life expectancy is also dependent on the influence of economic, functional, technological, social and legal obsolescence.

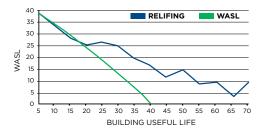

#### WEIGHTED AVERAGE SERVICE LIFE

Weighted Average Service Life (WASL) is a methodology used to determine the "Useful Life" of an asset. For buildings the WASL is the collective result of applying service life criteria to each element of a cost analysis; excluding capital recurrent expenditure other than routine maintenance.

### RELIFING

RElifing takes the "WASL" a stage further by considering the effect of capital upgrades, refurbishments, replacement of plant, architectural fabric and finishes. Below is a graphical representation of a RElifing profile for a typical office building, compared to the base WASL. RElifing analysis is useful for developers, owners and occupiers in financial planning, calculating depreciation and in the negotiation of long term property costs.

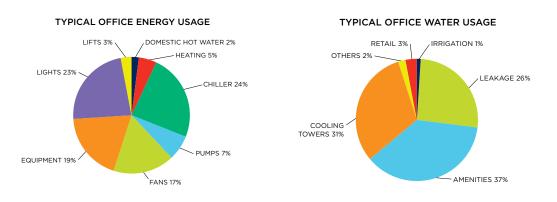

# ASSETS AND FACILITIES OUTGOINGS

Outgoings are the costs required to operate a property that are generally recoverable by a Landlord from the tenants. The recovery of outgoings is usually calculated by a sharing of costs amongst tenants relative to their leasehold interest. They generally cover the recurrent costs for the delivery of services, maintenance, power and statutory and management costs.

The level of recovery of outgoings is normally governed and regulated by leases and other agreements with tenants.

- The cost of outgoings varies depending upon:
- the level of management and services provided
- lease agreements
- quality, type and efficiency of the building
- location and statutory regimes applicable

The following graphs highlight typical component usage of both energy and water consumption for office buildings.

# ASSETS AND FACILITIES ESSENTIAL SAFETY MEASURES

The following table provides a brief overview of building owners' responsibilities with regard to certifying the annual maintenance of essential safety systems and measures within commercial buildings.

	2IC	ard	NSN	SA	TAS	ACT	٨A	Ę
IS MAINTENANCE OF ESSENTIAL SAFETY MEASURES REQUIRED BY LEGISLATION (OTHER THAN BCA)?	~	<ul> <li>✓</li> </ul>	✓	<ul> <li>✓</li> </ul>	✓	✓	×	~
IS THERE A PRESCRIBED FORM OF CERTIFICATE?	$\checkmark$	$\checkmark$	$\checkmark$	$\checkmark$	$\checkmark$	×	×	×
CERTIFICATE REQUIRED TO BE DISPLAYED	×	×	$\checkmark$	×	$\checkmark$	NA	NA	NA
CERTIFICATE REQUIRED TO BE FORWARDED TO AN AUTHORITY	×	$\checkmark$	$\checkmark$	$\checkmark$	×	NA	NA	NA
CAN FINES BE IMPOSED IF MAINTENANCE IS NOT CARRIED OUT?	✓	$\checkmark$	✓	×	✓	✓	NA	✓

The relevant legislation governing the essential safety measures by state are:

- ACT ACT Emergencies Act 2004
- NSW Environmental Planning and Assessment Regulations 2000
- **QLD** Queensland Fire and Emergency Services Act 1990 & Fire and Rescue Service Amendment Act 2006
- SA SA Development Act 1993 & Minister's Specifications SA 76
- TAS Fire Services Act 1979 & General Fire Regulations 2010
- VIC Building Regulations 2006 Part 12 Building Regulations 2018 Part 15
- WA Building Regulations 2012 & Building Amendment Regulations 2014
- NT Northern Territory Fire and Emergency Regulations

#### Note:

The above is a brief guide only. Other state or national legislation and laws may also be relevant. It is recommended that all property owners consult a building surveyor regarding responsibilities associated with maintenance of essential measures within their buildings.

# ASSETS AND FACILITIES CAPITAL ALLOWANCES (TAX DEPRECIATION)

The Australian Taxation Office (ATO) allows a tax deduction for the recovery of the cost of assets used in a business or for the production of income. The Income Tax Assessment Act (ITAA) allows two types of allowances for assets:

### **Division 40 - Depreciating Assets**

Assets with a limited effective life that are reasonably expected to decline in value. The decline in value is based on the cost and effective life of the depreciating asset, not its actual change in value. Examples of these are carpet, air conditioning plant, lights etc.

### **Division 43 - Capital Allowances**

Capital allowances are the building allowance and structural improvement deductions that are available for buildings. Depreciating rates are either 2.5% or 4% dependent on the use of the building and construction commencement date.

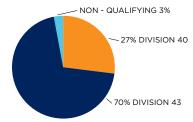

The ATO issued the latest effective life review of assets under TR2022/1 which came into effect on the 1st July 2022.

The following broad principles outline the rates of depreciation deductions relative to income producing assets under ITAA 1997 (Division 40 & 43).

- The effective life and hence the rate of depreciation of an item of plant can be self-assessed by the taxpayer
- Depreciating Assets (Division 40) are subject to a balancing adjustment on disposal. Capital works deductions (Division 43) are subject to Capital Gains Tax on disposal
- Low value pool option for assets less than \$1,000 in value depreciated at 18.75% in the first year and 37.50% in subsequent years

The Diminishing Value rate is currently 200% of Prime Cost rate (excluding low value pool), with the effect of accelerating the tax write off in earlier years of the asset's life

### TOTAL ALLOWANCES (\$)

Typical percentage apportionment of depreciation allowances based on new \$300m Commercial Office Tower including fitout with 6 Star Green Star certification.

RLB employs qualified staff, who are registered with the Tax Practitioners Board under the Tax Agent Services Act 2009, for the preparation of Capital Allowance Reports.

SCHEDULE OF ASSETS	PRIME COST %	DIMINISHING VALUE
THE FOLLOWING LIST GIVES A SAMPLE OF ELIGIBLE DEPRECIATING ASSETS.		
OFFICE BUILDING		
HOT WATER INSTALLATIONS	6.667	13.333
MULTI TYPE FIRE DETECTION SYSTEMS	4-16.67	8-33.33
CENTRAL AIR CONDITIONING (VARIOUS RATES APPLY TO EQUIPMENT COMPONENTS)	4-10	8-20
ROOM AIR CONDITIONING	10	20
PACKAGED AIR CONDITIONING	6.667	13.333
ELECTRIC HAND DRYERS	10	20
DEMOUNTABLE PARTITIONS	5	10
