RIDERS DIGEST DARWIN, AUSTRALIA 53RD EDITION

A yearly publication from RLB's Research & Development department. Riders Digest is a compendium of cost information and related data specifically prepared by RLB for the Australian construction industry.

While the information in this publication is believed to be correct, no responsibility is accepted for its accuracy. Persons desiring to utilise any information appearing in this publication should verify its applicability to their specific circumstances. Cost information in this publication is indicative and for general guidance only and is based on rates ruling at Fourth Quarter 2024 (unless stated differently). All figures exclude GST.

INTRODUCTION RIDER LEVETT BUCKNALL

RLB. WHERE PEOPLE MAKE PROGRESS

For over 240 years, RLB has thrived by bringing together the right people and doing things the right way.

We look out for our people, which means we look out for each-other. Kind of like a family, if that family had 4,500 different, diverse and amazing people around the world.

We work hard, enjoy the journey, and aim to do good, making a lasting positive impact on our communities and planet.

We are proud of our independence, we believe in straight talk, dreaming big and exceeding expectations. Because when the world counts on us, we count on each other.

At RLB, we live by four simple ideas: TRUTH. TRUST. TOGETHER. TOMORROW. Four values that live at the heart of RLB. A place where People Make Progress.

COST MANAGEMENT & QUANTITY SURVEYING

The secret to every project's commercial success, regardless of size, is to balance quality against costs. To help our clients achieve value for money, we offer a host of services from preliminary cost planning to value engineering, advice on comparative costs, materials selection to buildability to post-contract services.

Feasibility Studies

An accurate feasibility study is an essential prerequisite to any procurement decision-making process. A reliable feasibility study assesses the project's viability and offers alternative solutions if the numbers just don't stack up.

Whether a simple developer's return on capital cost feasibility is required or a detailed discounted cash flow feasibility, we can provide expert analysis and materials.

Our dynamic cost benchmarking data, together with expert cost modelling, helps our clients to review alternative design options, explore 'what if' scenarios and identify the most cost-effective options within the parameters of the brief.

Financial Institution Auditing

Our two-step approach to financial institution audits achieves the best outcomes for our clients. At the pre-commencement stage, RLB expands on the items identified in the financier's brief with a full analysis of all risk-related issues. The result is a comprehensive profile of the project. During the post-contract stage, RLB provides detailed cost-to-complete assessments. This ensures adequate funds, should the financier be required to initiate step-in rights.

We also prepare a pre-commencement report that outlines everything from project costs and adequacy of project documentation to authority approval monitoring, progress payment assessments and recommendations.

Post-Contract Services

Cost certainty during the construction phase relies on robust methodology and skilled staff. RLB applies proven cost management, monitoring and cost reporting procedures, and leads a productive working relationship with the project team. To manage the costs within the budget and support the project business plan, we:

- Review progress claims for work in progress and recommend payment values
- Monitor documentation changes
- Prepare regular financial statements estimating final cost
- Measure, price, and negotiate variations
- Structure agreement of final account
- Attend meetings to represent the financial interests of the client

Tendering and Documentation

With a global cost database and powerful software at our fingertips, we provide accurate and detailed tender documentation on some of the world's best projects. We can:

- Preparation of bills/schedule bills of quantities or schedule of rates
- Preparation of bid documentation for tendering contractors
- Provide strategic advice on methods of project procurement and tendering
- Advise on suitability of contractor tender lists
- Review tenders received and reconciliation to budget and recommend contractors
- Attendance at tender interviews

Value Engineering & Value Management

Delivering value against the project business plan is always a key measure of success. By integrating value and cost management, RLB has developed a powerful and dynamic approach that delivers the best outcomes. We lead participatory workshops with our clients to challenge options and design assumptions, and to encourage creative and lateral thinking. With a laser focus on both value and cost during the design phase, we deliver savings to the bottom line.

PROJECT & PROGRAMMING MANAGEMENT

The old cliché is true: time is money. That's why clients turn to RLB to manage both cost and time. With a deep knowledge of construction techniques, experience working for owners, developers and contractors, and a global database of up-to-the-minute benchmarks, we create bespoke solutions to ensure projects are completed on schedule and on budget.

Pre Contract

We often have clients turn to us when their project is simply sketch or a plan on a page. Our experienced team can:

- Prepare constructability reports to support feasibility studies
- Produce development or master programs at the preliminary design stage
- Design construction programs to determine construction timeframes and staging
- Enhance migration and office restack programming
- Prepare staging plans and construction method statements, progress monitoring and reporting, and pre-tender and tender construction programs
- Improve programming governance with contract programming clauses
- Review contractors' tender programs

Post Contract Audit

Reviewing, monitoring and auditing a contract is a necessary part of any project. RLB's team helps our clients to reassess the highest risk areas and uncover new opportunities. We can:

- Review agreements of contractors' construction programs
- Audit, monitor and report on progress
- Provide independent certifier support for financiers
- Support extension of time claims and litigation
- Advise on programming, project health checks and recovery planning

Litigation Support

Construction contracts can be challenging to navigate at the best of times. When problems do arise, you need a skilled, experienced team behind you.

The best outcomes always come from the best people. Our dedicated procurement and contractual advisory team guides clients throughout the project process, providing technical support and considered advice in specialist areas, such as dispute avoidance and resolution, and providing expert witnesses. Our claims preparation and defence experts provide strategic advice, management, negotiation and resolution of claims through adjudication or alternative dispute resolution.

RLB can help you with:

- Comprehensive claims management
- Dispute resolution services
- Scope definition claims appraisal
- Documentation and negotiation
- Expert witness and determination
- Arbitration and mediation

SUPERINTENDENT SERVICES

RLB's skilled professionals utilise their construction knowledge, cost management expertise for progress claim and variation assessments, contract document interpretation proficiency and programming know-how to deliver a full rounded superintendent service to our clients.

The Superintendent must have the trust and respect of all contract parties. RLB are independent to the design and construction processes and the Client, and therefore, we can provide a truly independent, impartial professional service.

If RLB is also undertaking a cost management role on a project, there is efficiency in some of the service delivery.

Expertise and experience backed by a rigorous approach sees us deliver assurance to our clients. RLB understands the importance of a robust methodology to ensure all aspects of the Contract is administered in a fair and diligent manner.

Placing client and contractor needs and project drivers at the core, our Superintendent(s) works closely with stakeholders to meet time, cost, and quality requirements, whilst maintaining predictability, compliance, and rigour at every stage.

ADVISORY

We are driven to ensure our clients' assets operate at maximum efficiency for the longest time and at the lowest cost. It's a challenge, but one we relish.

Certainty of budget expenditure drives many of our clients to look for long-term strategies that span the life of their investment. Total operating costs can often equal several times the initial capital cost. Our experienced team works with owners and occupiers to help them understand the total impact of their buildings.

Among our strategic services, RLB can:

- Deliver total asset management planning to ISO standards
- Provide asset recognition and rationalisation
- Analyse costs and benefits to determine the best options
- Advise on sustainability and environmental performance issues
- Undertake whole-life cost modelling.

Asset Relifing

We help our clients to sweat their assets. RLB has pioneered life-extension and repositioning studies to optimise the use of buildings. This methodology helps our clients to identify if, when and where to spend their money to capture remaining asset values and extend the life of existing buildings.

Facilities Consultancy

As the drive to create smart, sustainable assets grows, and as technology develops at pace, the challenge is not only to maximise and measure the performance of built assets. It is also to optimise the efficiency of those assets for both building owners and occupiers over the long term. To help our clients make the most of their assets through the entire life cycle, we can:

- Deliver facilities management planning and building quality assessments
- Audit facilities and operational performance
- Forecast maintenance planning and operating expenditure
- Conduct performance reviews, benchmarking, and post-occupancy evaluations
- Undertake space audits and utilisation studies

ADVISORY

Risk Mitigation and Due Diligence

Information is power, and our clients are increasingly looking for more detail to assist with decision-making, enhance value and mitigate risks.

We help our clients plan for their next projects by conducting risk assessments to review the scope of required work, identify and analyse project risks, prioritise key issues, and develop risk management action plans.

Among RLB's key advisory services to help you mitigate risk on your next project, we can:

- Review the scope of required work to identify project risks
- Forecast capital expenditure
- Prioritise key issues
- Develop risk analysis and customised risk-management action plans
- Assess insurance replacement costs assessments
- Undertake technical due diligence (for owners, vendors, purchasers, and tenants)
- Advise on services procurement, outsourcing, compliance, and supply chain issues

Property Taxation

The best financial, compliance and management outcomes can only be achieved with the right taxation advice. And that requires the best people behind you.

RLB's experience in property taxation covers all asset types. We provide proactive reporting and analysis of taxation changes – and help you to understand how they may affect your real estate decisions, including capital gains tax, land taxes, rating assessments and stamp duty.

We provide advice on capital allowances and property tax assessment, depreciation, inventories, and asset registers, as well as changes in tax legislation, as you optimise both existing assets and new projects.

Procurement Strategies

Choosing the best procurement strategy is at the heart of any project's commercial success. But in a market of escalating costs, this is easier said than done.

With each client's principal objectives in mind - from design quality and workmanship to cost certainty and program - we provide recommendations to achieve the optimum procurement strategy.

With our vast experience and knowledge behind us, RLB works with our clients to examine the issues and evaluate project or service delivery. We can:

- Deliver needs analysis and brief definition
- Undertake feasibility studies
- Assess options for clients to develop, own and lease
- Negotiate contractual arrangements
- Monitor and certify projects
- Lead workshops to uncover value engineering options.

RLB's expertise and experience extends to property transactions, services procurement, outsourcing operations, and supply chain management. Our clients want certainty in contractual outcomes, which is why they turn to RLB.

SUSTAINABILITY & CARBON

RLB's sustainability consultancy service covers all cost aspects of the sustainability agenda including ESD assessment tools like Green Star, carbon reduction through to social value. Our services are tailored to sustainable project delivery, with expert knowledge provided at every stage of the project lifecycle.

Building for our Future

Regulation and rating systems, consumer expectations and investor demands, advancing technology and resource constraints are transforming what we build, where we build and how we build it.

The built environment sector is always focused on the future. But with the world's buildings responsible for nearly 40% of the world's carbon emissions, the future is sharply in focus.

As one of the world's oldest and largest quantity surveying firms, RLB knows that cost is just one measure of value. How we measure and manage carbon emissions, alongside other economic, environmental, health and wellbeing imperatives, is a global challenge.

RLB has established a global carbon policy that aligns our business with international targets set out in the Paris Agreement. We have committed to achieve net zero emissions by 2030 as a global business.

We have also established a suite of services to support our clients as we work together to drive down emissions and uncover new value.

Sustainability Consultancy Services

RLB's sustainability consultancy service covers all cost aspects of the sustainability agenda including ESD assessment tools like Green Star, carbon reduction through to social value. Our services are tailored to sustainable project delivery, with expert knowledge provided at every stage of the project lifecycle.

RLB's approach is to identify key sustainability improvements and implement bespoke solutions that consider client goals and industry best practice, market drivers and potential legislative changes.

Linking Carbon & Estimating

Measuring, mitigating, and managing climate change is the responsibility of every industry. But much of the heavy lifting will fall with high-emitting sectors, including the building and construction sector. With this comes the challenge of decarbonising supply chains, investigating R&D solutions, and effectively collaborating across the sector to better forecast and reduce climate-related risks.

Embodied carbon emissions - the emissions that are locked in as soon as a building comes out of the ground - are particularly hard to abate. Upfront emissions generated during manufacture, construction, transport, and demolition will constitute an estimated 85% of the industry's footprint by 2050.

RLB is helping our clients to quantify these hidden emissions with a methodology that assesses upfront embodied carbon impacts and offers concise, accurate and informative end-to-end advice across the building lifecycle.

Our Carbon Estimating Process

RLB's carbon estimating process operates as a one-stop-shop. This end-to-end process eliminates the need for RLB to obtain solutions or advice from third-party suppliers and delivers high levels of transparency and quality to our clients from asset design to disposal.

OUR CARBON ESTIMATING PROCESS

1. Initial Design

Establish initial upfront embodied carbon impact to inform and contribute to the client's aspirations

3. Contract Documentation

Complete carbon estimate assessment and pre-construction lifecycle assessment (LCA)

5. Building Operations

Undertake post-construction LCA including carbon neutral and Green Star Buildings certification

2. Design Development

Provide carbon estimate assessments as the design develops, inclusive of strategic carbon pathways

4. Construction

Work with contractors and suppliers to achieve carbon neutral and Green Star Buildings targets

6. Asset Management

Implement and audit the Strategic Asset Management Plan (SAMP) of the building or portfolio on an ongoing basis until disposal

The following data represents estimates of current building costs in the respective market. Costs may vary as a consequence of factors such as site conditions, climatic conditions, standards of specification, market conditions etc.

Rates are in national currency per square metre of Gross Floor Area except as follows:

Chinese cities, Hong Kong and Macau: Rates are per square metre of Construction Floor Area, measured to outer face of external walls.

Singapore, Ho Chi Minh City, Jakarta and Kuala Lumpur: Rates are per square metre of Construction Floor Area, measured to outer face of external walls and inclusive of covered basement and above ground parking areas.

Chinese cities, Hong Kong, Macau and Singapore: All hotel rates are inclusive of Furniture Fittings and Equipment (FF&E).

CONSTRUCTION RATES

The following range of current building costs could be expected should tenders be called in the respective city. Items specifically included are those normally contained in a Building Contract.

Specific exclusions:

- Goods & Services Tax (GST)
- Land
- Legal and professional fees
- · Loose furniture and fittings
- Site works and drainage
- Subdivisional partitions in office buildings
- Telstra and private telephone systems (PABX)
- Tenancy works

NOTES

- i $\,$ Car Parking costs have been excluded to arrive at the various building rates.
- ii Refer to Page 19 for definitions.
- ii The percentages shown against each building may be used to calculate the rate per Net Lettable Area.

Example: the NLA rate for a Premium Office CBD 10 to 25 Storeys would be calculated NLA rate = $\$/M^2$ ÷ efficiency percentage.

AUSTRALIAN CONSTRUCTION BUILDING SERVICES COST RANGES

All costs current as at Fourth Quarter 2024. Refer to www.rlb.com/ccc for updates.

AUSTRALIAN CONSTRUCTION DEFINITIONS

CBD

Central Business District.

BUILDING WORKS

Building works include substructure, structure, finishings, fittings, preliminary items, attendance and builder's work in connection with services.

BUILDING SERVICES

Building services include special equipment, hydraulics, fire protection, mechanical, vertical transport, building management and electrical services.

OFFICE BUILDINGS

Premium offices are based on landmark office buildings located in major CBD Office Markets, which are pacesetters in establishing rents.

Grade A offices are based on high quality buildings which are built for the middle range of the rental market.

(used as generic descriptions for Building Cost Ranges on page 16).

HOTELS

| RATING | GFA PER ROOM | | | | | | | | |
|------------|----------------------|---------------|--------------|--|--|--|--|--|--|
| RATING | TOTAL | ACCOMMODATION | PUBLIC SPACE | | | | | | |
| FIVE STAR | 85-120 M² | 45-65 M² | 40-55 M² | | | | | | |
| FOUR STAR | 60-85 M ² | 35-45 M² | 25-40 M² | | | | | | |
| THREE STAR | 40-65 M² | 30-40 M² | 10-25 M² | | | | | | |

Note: Public space includes service areas.

CAR PARKS

Open Deck Multi-storey — minimal external walling.

Basement — CBD locations incur higher penalties for restricted sites and perimeter conditions.

INDUSTRIAL BUILDINGS

Quality reflects a simplified type of construction suitable for light industry.

Exclusions: hardstandings, roadworks and special equipment.

AGED CARE

Single storey domestic construction with no operating theatre capacity, minimal specialist and service areas. 35-45 M2 GFA/bed (150 beds).

HOSPITAL

Low rise hospital (45-60 M2 GFA/Bed) - Minimal operating theatre capacity, specialist and service areas.

Low rise hospital (55-80 M2 GFA/Bed) - Major operating theatre capacity including extensive specialist and service areas.

Exclusions: Loose furniture, special medical equipment.

CINEMAS

Multiplex Group Complex (warm shell). 2,000-4,000 seats.

Exclusions: Projection equipment, seating.

SHOPPING CENTRES

Department Store

Partially finished suspended ceilings and painted walls.

Exclusions: Floor finishes, shop fittings, etc.

Supermarket/Variety Store

Fully finished and serviced space.

Exclusions: Cool rooms, shop fittings, refrigeration equipment, etc.

Malls

Fully finished and serviced space.

Specialty Shops

Partially finished with ceilings, unpainted walls and power to perimeter point.

Exclusions: Floor finishes and shop fittings.

SMALL SHOPS AND SHOWROOMS

Exclusions: Floor finishes, plumbing (other than hot and cold water to sink fittings in each shop) and shop fittings.

RESIDENTIAL

Single Storey or 1-3 Storey

Units reflect medium quality accommodation.

Multi-Storey

Units reflect medium to luxury quality and air conditioned accommodation up to 80 storeys in height.

Note: the ratio of kitchen, laundry and bathroom areas to living areas considerably affects the cost range. Range given is significantly affected by the height and configuration of the building.

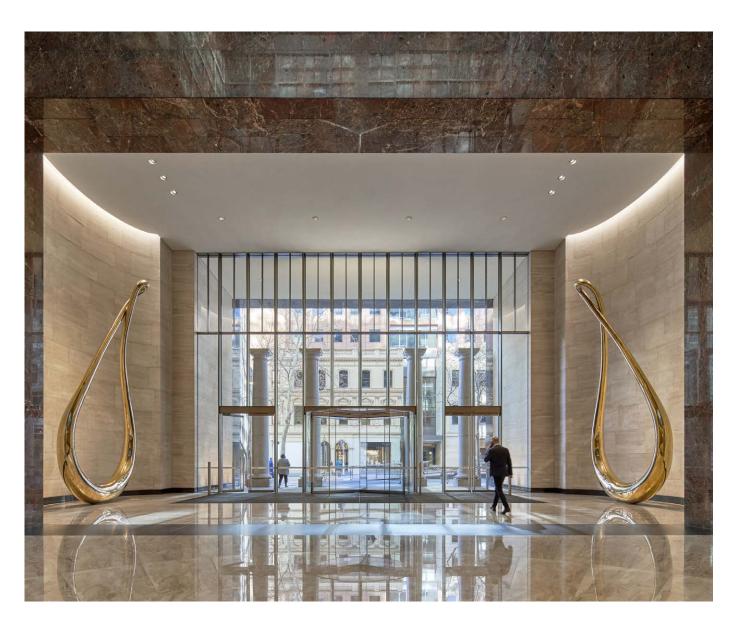

Exclusions: Loose furniture, special fittings, washing machines, dryers and refrigerators.

Rider Levett Bucknall Award for Best Public Art Project

This award celebrates excellence in integrating public art within developments, transforming spaces into vibrant, engaging environments that enrich our cities and communities.

Eligibility for the award requires the Public Art Project to be commissioned by the Property Developer or Owner and completed by 31 December 2023. The project must have been open and accessible to the public for at least one year as of 31 December 2024. Only members of the Property Council of Australia may enter, with the nominator or owner required to be a member.

2024 WINNER

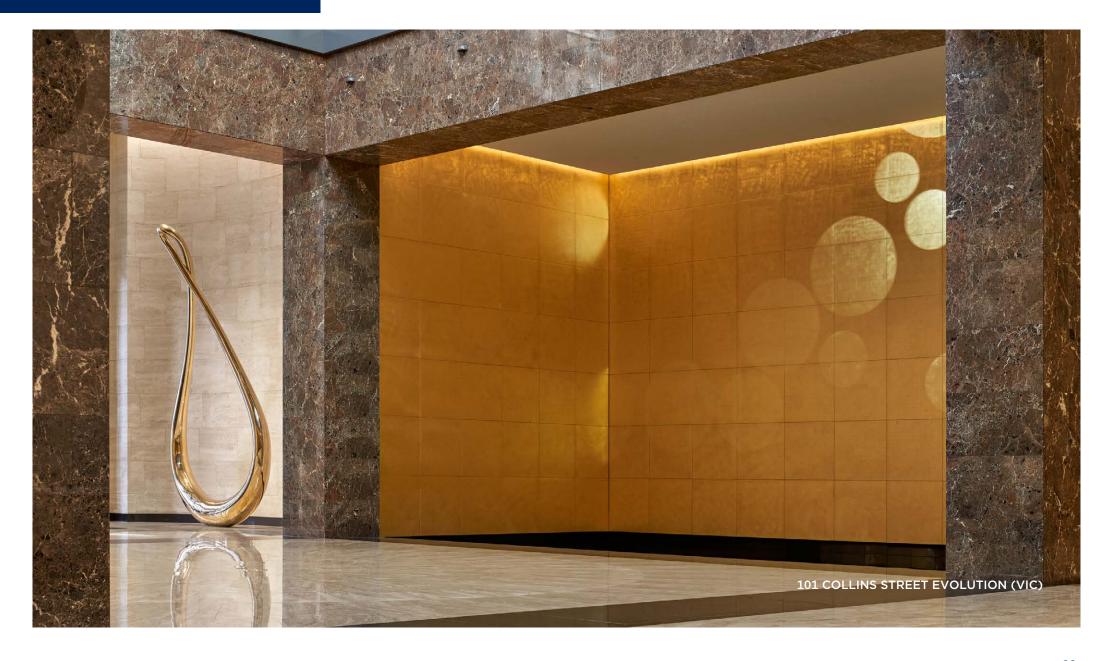

101 COLLINS STREET EVOLUTION (VIC) NOMINATED BY JLL

OWNED BY 101 COLLINS ST

Art has always been synonymous with 101 Collins Street. It is home to some of the most compelling gallery spaces in the city. Exhibiting acclaimed local and international artists, a suite of permanent public artworks reflects 101 Collins' past, present and future as an ardent contributor to Melbourne's art community.

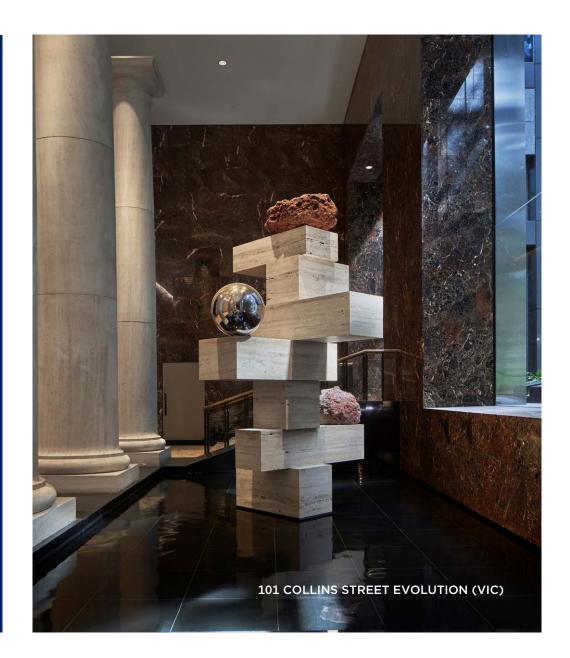

2024 WINNER

35

This award recognises the use of public art within Australian developments to create brilliant spaces and, in turn, enrich and enliven our cities and suburbs.

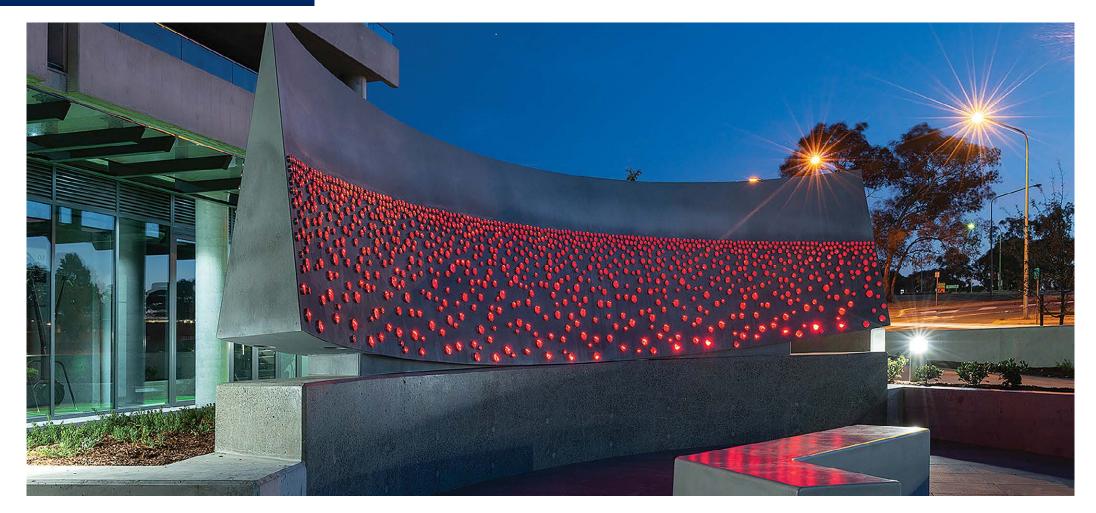

CONNECTIVITY - KARINGAL ARTS TRAIL - VIC NOMINATED BY ISPT OWNED BY ISPT

Connectivity - Karingal Arts Trail delivers landmark public art to the Mornington Peninsula in Sound Shell, a 2.5-metre sculpture by local artist Christabel Wigley. Accompanied by an interactive art journey spanning eight works by six Australian artists, Connectivity is an ISPT-led placemaking partnership including art group McClelland and Bunurong Land Council.

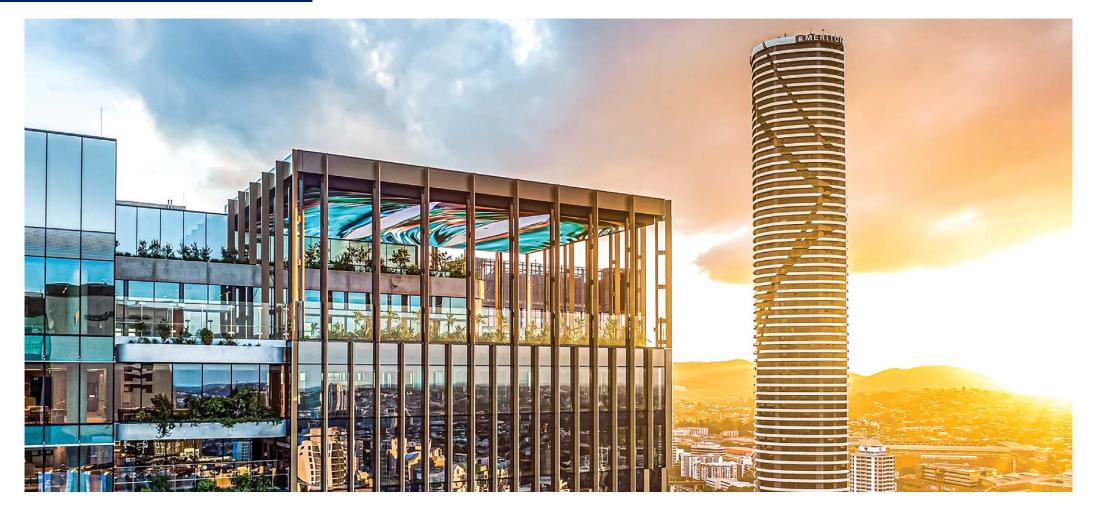

FIELD OF LIGHT - ACT

NOMINATED BY HINDMARSH CONSTRUCTION AUSTRALIA

OWNED BY HINDMARSH CONSTRUCTION AUSTRALIA

"Field of Lights" at Iskia Apartments blends art and technology, paying tribute to the historical presence of the RSL while fostering community engagement. With programmable LED lights creating an immersive experience, it honours veterans' sacrifices, promotes sustainability, and celebrates the site's rich heritage as a hub for community connection.

HERITAGE LANES - QLD NOMINATED BY MIRVAC AND M&G REAL ESTATE OWNED BY MIRVAC AND M&G REAL ESTATE

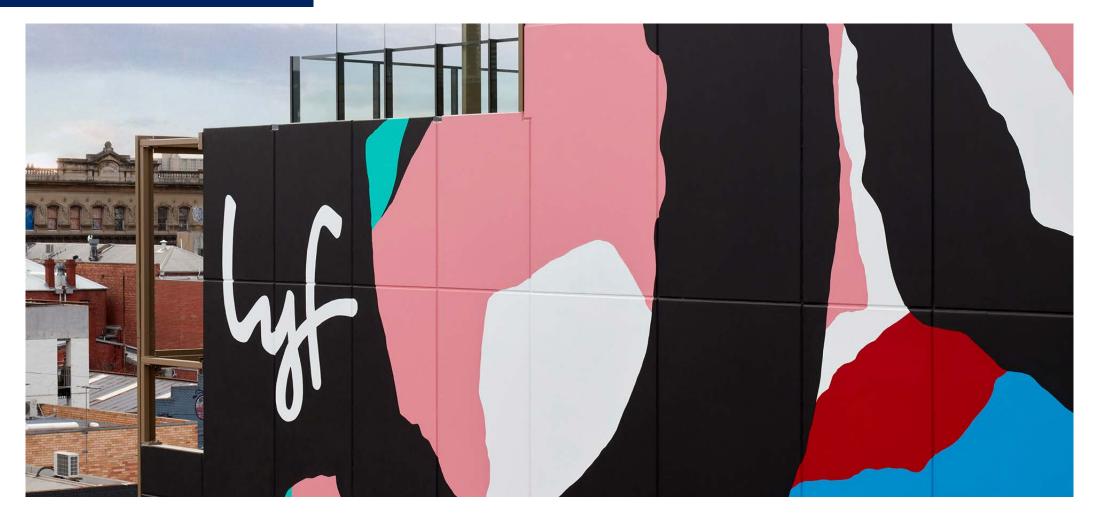

Heritage Lanes strikes a unique balance between past and present, offering a modern, state-of-the-art workplace and lifestyle destination, while paying homage to its impressive heritage via an enviable public art collection. With sustainable design principles, award winning art and world-class amenities Heritage Lanes sets a new standard in office assets.

LAYERS OF US - NSW

NOMINATED BY HUNTER AND CENTRAL COAST DEVELOPMENT CORPORATION OWNED BY HUNTER AND CENTRAL COAST DEVELOPMENT CORPORATION

Hunter and Central Coast Development Corporation and artist Jasmine Craciun have created 'Layers of Us', a bold interpretive artwork and cultural centrepiece in Newcastle's Honeysuckle precinct. Tying seamlessly into the waterfront promenade, it draws on the history of Honeysuckle, celebrating the area's First People and their flourishing way of life.

LYF ON OXFORD - VIC NOMINATED BY URBAN DEVELOPED BY URBAN

Lyf on Oxford embeds Collingwood's world renowned street art scene into the very core of the hotel's identity, both internally and externally. The scale and variety of application is what makes it an exception example of how public art can be implemented in a new development.

RIDERS DIGEST

DARWIN, AUSTRALIA 53RD EDITION

ACKNOWLEDGEMENTS

Rider Levett Bucknall wish to express their appreciation for advice received from the following organisations in the preparation of this compendium:

Property Council of Australia

Measurement of Net Lettable Area.

Cushman Wakefield, JLL, Knight Frank, Savills, Colliers Research

Land Values, Rents and Yields, Rental Growth Rates and Construction Sector Data.

WSP Structures

Reinforcement Ratios.

Australian Bureau of Statistics

Construction and Building Data and CPI information.

DARWIN CONSTRUCTION SITEWORKS COSTS

LANDSCAPING

| | LOW | HIGH | PER |
|--|--------|--------|---------|
| LIGHT LANDSCAPING TO LARGE AREAS WITH MINIMAL PLANTING AND SITE FORMATION BUT EXCLUDING TOPSOIL AND GRASSING | 42,250 | 64,000 | HECTARE |
| DENSE LANDSCAPING AROUND BUILDINGS INCLUDING SHRUBS, PLANTS, TOPSOIL AND GRASSING | 75 | 145 | M^2 |
| GRASSING ONLY TO LARGE AREAS INCLUDING TOPSOIL, SOWING AND TREATING | 30 | 50 | M^2 |

CAR PARKS - ON GROUND

Based on 30 M^2 overall area per car with asphalt paving including sub base and sealing.

| | LOW | HIGH | PER |
|--|-------|-------|----------|
| LIGHT DUTY PAVING. | 3,700 | 4,250 | CARSPACE |
| HEAVY DUTY PAVING TO FACTORY TYPE COMPLEX, LARGE AREA WITH MINIMAL SITE FORMATION, DRAINAGE AND KERB TREATMENT | 4,500 | 5,300 | CARSPACE |
| LIGHT DUTY PAVING TO SHOPPING CENTRE COMPLEX, LARGE AREA WITH MINIMAL SITE FORMATION, AND INCLUDING DRAINAGE AND KERB TREATMENT | 4,250 | 5,100 | CARSPACE |

ROADS

Asphalt finish including kerb, channel and drainage.

| | LOW | HIGH | PER |
|---|-------|-------|-----|
| RESIDENTIAL ESTATE 6.80 METRES WIDE EXCLUDING FOOT PATH AND NATURE STRIP | 1,600 | 2,150 | М |
| INDUSTRIAL ESTATE 10.4 METRES WIDE INCLUDING MINIMAL TO EXTENSIVE FORMATION | 2,550 | 3,200 | М |

DARWIN CONSTRUCTION DEMOLITION COSTS

Demolition costs include grubbing up footings, sealing services, temporary shoring, supports, removal of demolished materials, rubbish and site debris.

Exclusions: work carried out outside normal working hours, credit value of demolished materials and restricted site conditions.

| BUILDING TYPE | LOW | HIGH | PER |
|--|-----|------|-------|
| SINGLE STOREY TIMBER FRAMED HOUSE WITH TIMBER CLADDING AND TILED ROOF | 80 | 160 | M^2 |
| SINGLE/DOUBLE STOREY BRICK HOUSE WITH TILED ROOF | 90 | 180 | M^2 |
| SINGLE STOREY FACTORY/WAREHOUSE WITH REINFORCED CONCRETE GROUND SLAB, TIMBER OR STEEL FRAMED WALLS | | | |
| METAL CLAD | 80 | 120 | M^2 |
| BRICK CLAD | 95 | 145 | M^2 |
| TWO STOREY OFFICE BUILDING WITH REINFORCED CONCRETE FRAME MASONRY CLADDING AND METAL ROOF | 135 | 185 | M^2 |
| MULTI-STOREY OFFICE BUILDING UP TO 15 FLOORS WITH MASONRY CLADDING | | | |
| REINFORCED CONCRETE | 240 | 420 | M^2 |
| STRUCTURAL STEEL | 310 | 440 | M^2 |
| MULTI-STOREY OFFICE BUILDING UP TO 25 STOREYS, CONSTRUCTED OF STEEL FRAME WITH MASONRY CLADDING | 370 | 480 | M^2 |

HOTEL FURNITURE, FITTINGS & EQUIPMENT COSTS

The cost of hotel furniture, fittings and equipment (FF&E) varies within a wide range and is dependent on the quality of items provided. The following gives the expected cost ranges for different rating hotels. These costs include fitting out public areas.

| | LOW | HIGH | PER |
|-------------------|--------|--------|---------|
| FIVE STAR RATING | 64,000 | 95,000 | BEDROOM |
| FOUR STAR RATING | 37,000 | 53,000 | BEDROOM |
| THREE STAR RATING | 31,750 | 47,500 | BEDROOM |

DARWIN CONSTRUCTION OFFICE FITOUT COSTS

The following costs, which include workstations, are an indication of those currently achievable for good quality office accommodation, inclusive of all loose and fixed furniture.

| TYPE OF TENANCY | OP PLAN | | FUI PARTIT | | PER |
|--|------------|-------|---------------|-------|-------|
| | LOW | HIGH | LOW | HIGH | |
| INSURANCE OFFICES, GOVERNMENT DEPARTMENT | 1,600 | 2,150 | 2,450 | 3,000 | M^2 |
| MAJOR COMPANY HEADQUARTERS | 2,250 | 3,000 | 2,750 | 3,800 | M^2 |
| SOLICITORS, FINANCIERS | 2,150 | 2,650 | 2,850 | 4,250 | M^2 |
| EXECUTIVE AREAS AND FRONT OF HOUSE | - | - | 5,900 | 7,200 | M^2 |
| COMPUTER AREAS | 2,800 | 5,300 | - | - | M^2 |

Computer areas include access flooring and additional services costs but exclude computer equipment.

WORKSTATIONS

Fully self-contained workstation module size $1,800 \times 1,800 \text{ MM}$ including screens generally 1,220 MM high (managerial 1,620 MM high), desks, storage cupboards, shelving.

| TYPE OF WORKSTATION | LOW | HIGH | PER |
|---------------------|-------|-------|------|
| CALL CENTRE | 2,450 | 3,800 | EACH |
| SECRETARIAL | 3,700 | 5,500 | EACH |
| TECHNICAL STAFF | 3,750 | 4,450 | EACH |
| EXECUTIVE | 4,650 | 6,800 | EACH |

REFURBISHMENT

Office

The following refurbishment costs include for demolition and removal of partitions and internal finishes, provide new floor, ceiling and wall finishes, but excluding fitting out and removal of asbestos and upgrading of building for GreenStar ratings. The lower end of the range indicates re-use and modification of existing specialist building services, while the upper end of the range indicates complete replacement of equipment and accessories.

| | LOW | HIGH | PER |
|--|-------|-------|-------|
| CBD OFFICES TYPICAL FLOOR | 1,600 | 2,950 | M^2 |
| CBD OFFICES CORE UPGRADE (EXCLUDING LIFTS MODERNISATION) | 1,800 | 3,200 | M^2 |

DARWIN CONSTRUCTION RECREATIONAL FACILITIES COSTS

BASKETBALL CENTRE

| | LOW | HIGH | PER |
|---|-------|-------|-------|
| CONSISTING OF BRICK WALLS, STEEL PORTAL FRAME AND PURLINS WITH METAL ROOF, TIMBER FLOOR TO PLAYING AREA, PUBLIC SEATING, PUBLIC TOILETS AND CHANGE ROOMS | 4,250 | 5,300 | M^2 |

SWIMMING POOL CENTRES

| | LOW | HIGH | PER |
|---|-------|-------|-------|
| INCLUDING FOYER, KIOSK, OFFICE, LOCKERS, ADMINISTRATION OFFICES, CHANGE ROOMS | 6,400 | 8,000 | M^2 |

SWIMMING POOLS

High quality fully tiled including drainage and filtration but excluding surrounding paving and enclosures.

| | LOW | HIGH | PER |
|---|-----------|-----------|------|
| HALF OLYMPIC (25.0 X 12.5 M) | 2,650,000 | 3,175,000 | EACH |
| EXTRA FOR HEATING | 100,000 | 150,000 | EACH |
| EXTRA OVER FILTRATION AND DOSING PLANT FOR OZONE BASED DOSING SYSTEM | 150,000 | 200,000 | EACH |
| EXTRA FOR WET DECK | 55,000 | 85,000 | EACH |
| OLYMPIC (50.0 X 21.5 M) | 6,125,000 | 6,875,000 | EACH |
| EXTRA FOR HEATING | 175,000 | 275,000 | EACH |
| EXTRA FOR FILTRATION AND DOSING PLANT | 300,000 | 500,000 | EACH |
| EXTRA OVER FILTRATION AND DOSING PLANT FOR OZONE BASED DOSING SYSTEM | 200,000 | 300,000 | EACH |

SMALL BOAT AND YACHT MARINA BERTHS

Floating pontoon walk-ways, serviced with power and water.

| | LOW | HIGH | PER |
|----------------------|---------|---------|-------|
| DOUBLE LOADED BERTHS | 31,750 | 64,000 | BERTH |
| SINGLE LOADED BERTHS | 37,000 | 69,000 | BERTH |
| SUPER YACHTS | 265,000 | 527,500 | BERTH |

TENNIS COURTS

Six courts with minimal site formation and including sub base playing surface, chainwire fence 3.60 M high and spoon drains.

| | LOW | HIGH | PER |
|-------------------------------|---------|---------|-------|
| SYNTHETIC GRASS | 90,000 | 107,500 | COURT |
| RED POROUS (EN-TOUT-CAS) | 42,250 | 64,000 | COURT |
| SYNTHETIC ACRYLIC (FLEXIPAVE) | 69,000 | 90,000 | COURT |
| ASPHALT (5MM) | 59,000 | 80,000 | COURT |
| REBOUND ACE | 132,500 | 160,000 | COURT |
| PLEXICUSHION | - | - | COURT |
| CONCRETE | 53,000 | 69,000 | COURT |
| FLOODLIGHTING | 16,000 | 26,500 | COURT |

GOLF COURSES

18 hole championship course including siteworks, finishing works, irrigation, grassing, landscaping, green keeping, plant and equipment, course furniture and groundstaff to practical completion but excluding mains water supply to course, roads, carparks and clubhouse. The following are indicative costs only.

| | LOW | HIGH | PER |
|--|------------|------------|--------|
| SANDY SOIL SITE, REQUIRING MINIMAL EXCAVATION AND SITE PREPARATION | 8,975,000 | 15,825,000 | COURSE |
| SITE REQUIRING ROCK EXCAVATION | 13,200,000 | 21,100,000 | COURSE |
| SWAMPY SITE REQUIRING DREDGING FOR LAKES, ETC. AND EXTENSIVE FILL | 15,825,000 | 26,375,000 | COURSE |

PLAYING FIELDS

Soccer, rugby, Australian rules, hockey or similar turfed areas with minimal site formation and including sub base, drainage and turfing.

| | LOW | HIGH | PER |
|---------------------|-----|------|-------|
| EXCLUDES SPRINKLERS | 55 | 160 | M^2 |

GRANDSTANDS

Prestige metropolitan grandstand with a high standard of finishes and facilities including bars, stores, meeting/change rooms, dining and kitchen area.

| | LOW | HIGH | PER |
|------------|-------|--------|------|
| GRANDSTAND | 7,400 | 10,750 | SEAT |

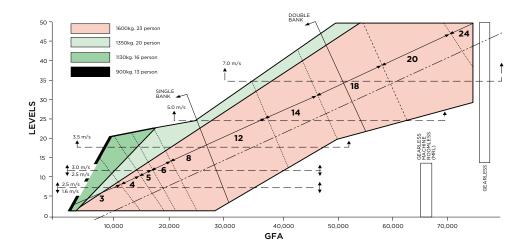

DARWIN CONSTRUCTION VERTICAL TRANSPORTATION

LIFT SELECTION CHART

To calculate the number and type of lifts:

- Locate a point on the graph by using the GFA in M² shown on the bottom axis and number of levels on the left axis.
- The colour at the intersection point indicates the lift capacity, the horizontal lines the lift speed and the angled lines the number of lifts and the number of banks.
- By extending the horizontal line to the far right hand side, the type of lift required can be obtained.

Destination control is a optional lift control system in which passengers key-in the number of their destination floor at a button panel located in their current lift lobby area. Each floor lobby has a button panel. The lifts cars themselves do not have destination buttons and are designated to serve the floors as required. Destination control will generally boost the "Up peak" or morning performance of the lift system and will provide additional security provisions. The performance of the lift system during lunch times and at the end of the day is generally not improved with this control system. Lobby area may need to be increased.

| APPLICATION | LIFT TYPE | SPEED M/S | NO. OF FLOORS SERVED | BASE COST \$ | | ADDITIONAL FLOOR | EXPRESS FLOOR |

DARWIN DEVELOPMENT STAMP DUTIES

A conveyance or an agreement to convey dutiable property is liable to stamp duty. Where dutiable property is acquired without being evidenced by a dutiable document, the person acquiring the property is required to complete a statement detailing the transaction. Duty is calculated on the purchase price or unencumbered value of the dutiable property, whichever is the greater, as follows:

WHERE THE DUTIABLE VALUE DOES NOT EXCEED \$525,000 IN ACCORDANCE WITH THE FOLLOWING FORMULA: $D = (0.06571441 \times V^2) + 15V$ WHERE D = THE DUTY PAYABLE IN \$ $AND \ V = \frac{THE \ DUTIABLE \ VALUE}{1000}$

| DUTIABLE VALUE | RATE OF DUTY |
|--|------------------------------|
| WHERE THE DUTIABLE VALUE EXCEEDS \$525,000 BUT LESS THAN \$3,000,000 | 4.95 PER CENT OF THAT AMOUNT |
| WHERE THE DUTIABLE VALUE EXCEEDS \$3,000,000 BUT LESS THAN \$5,000,000 | 5.75 PER CENT OF THAT AMOUNT |
| WHERE THE DUTIABLE VALUE EXCEEDS \$5,000,000 | 5.95 PER CENT OF THAT AMOUNT |

Refer to http://www.treasury.nt.gov.au/

Concessions are also available for first home buyers and low/middle income earners.

A stamp duty exemption is available on house and land packages through the House and Land Package Exemption (HLPE) scheme. This applies to eligible packages purchased from a building contractor between 1 July 2022 and 30 June 2027.

DARWIN DEVELOPMENT LAND TAX

Land tax is not payable on the value of any property in the Northern Territory.

DARWIN DEVELOPMENT PLANNING - CAR PARKING

The following car parking information is derived from the Northern Territory Planning Scheme, Part 5, Table to Clause 5.2.4.1, which details the appropriate number of car parking spaces to be provided to service particular uses of land.

Full details of the Northern Territory Planning Scheme can be found at https://nt.gov.au/property/land-planning-and-development/our-planning-system/nt-planning-scheme

| USE OR DEVELOPMENT | MINIMUM NUMBER OF CAR PARKING SPACES REQUIRED | MINIMUM NUMBER OF CAR PARKING SPACES REQUIRED WITHIN ZONE CB IN DARWIN |
|---------------------|---|--|
| GENERAL INDUSTRY | 1 FOR EVERY 100 M² OF NET FLOOR AREA OTHER THAN OFFICES PLUS 4 FOR EVERY 100 M² OF NET FLOOR AREA OF OFFICE PLUS 1 FOR EVERY 250 M² USED AS OUTDOOR STORAGE | |

DARWIN DEVELOPMENT SECTOR DATA

The rents and yields are indicative of modern average quality existing accommodation in each location. Factors causing variations to these rates and yields are: location – age – quality – size of building. Unless otherwise stated, net rentals are given below, ie. the tenant pays all outgoings. Allowance has been made for the effects of rental incentives, rent free periods, etc. ie. the rates are net effective rents.

DARWIN DEVELOPMENT RLB CONSTRUCTION MARKET ACTIVITY CYCLE

Activity within the construction industry traditionally has been subject to volatile cyclical fluctuations. The RLB Construction Market Activity Cycle (cycle) is a representation of the development activity cycle for the construction industry within the general economy.

Within the general construction industry, RLB considers seven sectors to be representative of the industry as a whole.

Each sector is assessed as to which of the three zones (peak, mid or trough) best represents the current status of that sector within the cycle, then further refined by identifying whether the current status is in a growth or a decline phase.

The 'up' and 'down' arrows within the table represent whether the sector is in a growth or decline phase with the colour of the arrow determining the zone within the cycle.

BENCHMARKS REGIONAL INDICES

The construction cost information in this publication is based upon rates for capital city construction projects and are current for the Fourth Quarter 2024. For towns or cities outside capital cities, costs can be expected to vary in accordance with the following table of indices:

| NEW SOUTH WALES | | QUEENSLAND | | WESTERN AUSTRALIA | | |
|-----------------|-----|----------------|-----|-------------------|-----|--|
| SYDNEY | 100 | BRISBANE | 100 | PERTH | 100 | |
| ARMIDALE | 105 | CAIRNS | 112 | ALBANY | 125 | |
| COFFS HARBOUR | 100 | GLADSTONE | 120 | BROOME | 175 | |
| NEWCASTLE | 99 | GOLD COAST | 100 | BUNBURY | 115 | |
| ORANGE | 106 | MACKAY | 120 | CARNARVON | 160 | |
| TAMWORTH | 102 | SUNSHINE COAST | 100 | ESPERANCE | 140 | |
| WAGGA WAGGA | 106 | TOWNSVILLE | 110 | GERALDTON | 125 | |
| WOLLONGONG | 100 | | | KALGOORLIE | 150 | |
| | | | | KUNUNURRA | 185 | |
| | | | | PORT HEDLAND | 190 | |
| | | | | TOM PRICE | 195 | |

The above table should be used only as a comparative guide, and is only appropriate for the urban precincts nominated and for the larger commercial projects.

Care must be taken to review specific local market conditions within the anticipated time frame of a project's development period before establishing and committing viable budgets for projects.

In the event that projects are required to be constructed in remote locations or in areas without urban infrastructure, then special consideration must be given to the budget structure of these projects. Each project must be considered in detail and its specific resource requirements assessed and sourced to establish budget costs.

RLB recommend that advice on local market conditions be sought from our regional offices when initial project budgets and feasibility studies are in the process of establishment. Our regional offices are identified on page 57.

BENCHMARKS KEY CITY RELATIVITIES - Q4 2024

RLB's Key City Relativity Matrix highlights the cost relativity between key Australian cities. The Relativity Matrix compares the general cost of building between cities. Each column represents a base city indexed to 100 with other city's relativities re-indexed to that base city.

In order to calculate the relativity between different cities, the difference can be calculated using the following formula:

where: $Ccc = Bcc \times (\frac{Cr}{Cb})^{-1}$

CCC = COMPARED CITY COST BCC = BASE CITY COST CR = RELATIVITY OF COMPARED CITY
CB = RELATIVITY OF BASE CITY

For example, when comparing costs between Sydney (base city) and Perth (compared city), Sydney building costs are generally 10% more than Perth i.e. (100/91) and Perth is 9% cheaper than Sydney i.e. (100/109).

If the tendered price of a building in Sydney was \$1,000,000, the equivalent cost in Perth would be \$910,000 i.e. $(1,000,000 \times (100/91)^{-1})$ and conversely a \$1,000,000 building in Perth would cost \$1,090,000 in Sydney, i.e. $1,000,000 \times (100/109)^{-1}$

BENCHMARKS OFFICE BUILDING EFFICIENCIES

The efficiency of an office building is expressed as a percentage of the Net Lettable Area (NLA) to the Gross Floor Area (GFA). The table below indicates that relationship to the GFA of the whole building both with car parks and basements included and excluded, that could be expected for an average project in the nominated category. Also shown is the average net to gross efficiency of the office floors only in each of the eight building types listed below.

| | EFFICIENCY | | | | | | | |
|--------------------------------|--------------|--------------|-----------------------|--|--|--|--|--|
| | BASEMENTS AN | ND CAR PARKS | | | | | | |
| TYPE OF CBD OFFICE BUILDING | INCLUDED % | EXCLUDED % | OFFICE FLOORS % | | | | | |
| PRESTIGE | | | | | | | | |
| 10 TO 25 STOREYS | 63-68 | 75-80 | 85-90 | | | | | |
| 25 TO 40 STOREYS | 58-63 | 70-75 | 80-85 | | | | | |
| 40 TO 55 STOREYS | 53-58 | 68-73 | 75-80 | | | | | |
| INVESTMENT | | | | | | | | |
| UP TO 10 STOREYS | 69-74 | 81-85 | 86-91 | | | | | |
| 10 TO 25 STOREYS | 64-69 | 76-81 | 81-86 | | | | | |
| 25 TO 40 STOREYS | 59-64 | 71-76 | 76-81 | | | | | |
| INVESTMENT, OTHER T | HAN | | | | | | | |
| UP TO 10 STOREYS | 70-75 | 82-86 | 87-92 | | | | | |
| 10 TO 25 STOREYS | 65-70 | 77-82 | 82-87 | | | | | |

PLANT ROOM SPACE

Generally plant room space represents 6-11% of the GFA of a multi-storey office building.

REINFORCEMENT RATIOS

The following ratios give an indication of the average weight of reinforcement per cubic metre of concrete for the listed elements. Differing structural systems and sizes of individual elements and grid sizes will cause considerable variation to the stated ratios. For project specific ratios a structural engineer should be consulted.

| | AVE KG/M³ | | AVE KG/M³ |
|-------------------------|-----------|---|-----------|
| STRIP FOOTINGS | 50 | STRAP BEAMS | 120 |
| COLUMN BASES | 40 | SLAB ON GROUND | 40 |
| PILE CAPS | 50 | SUSPENDED SLABS 100-150 MM ONE AND TWO WAY | 90 |
| BORED PIER | 90 | 250 MM FLAT PLATE | 120 |
| RAFT FOUNDATION | 70 | 250 MM WAFFLE | 160 |
| PEDESTAL & STUB COLUMNS | 240 | COLUMNS | 240 |
| RETAINING WALLS | | | |
| 1-2 STOREY | 70 | BEAMS | 170 |
| 2-3 STOREY | 120 | | |
| GROUND BEAMS | 120 | WALLS (CORE) | 140 |
| | | STAIRS | 80 |

BENCHMARKS LABOUR AND MATERIALS TRADE RATIOS

The following represents the ratio of on-site labour to material for various trades and sub-trades based upon our own survey.

The figures are relevant to all works constructed by traditional methods; variations to these methods will change the ratios, i.e. on-site fabrication of items traditionally factory fabricated such as joinery fittings, metalwork items, etc.

| PRELIMINARIES | 40 10 50 |
|-----------------------------------|--------------|
| DEMOLISHER | 85 15 |

BENCHMARKS METHOD OF MEASUREMENT OF BUILDING AREAS

The rules for measurement of building areas are defined by the Australian Institute of Quantity Surveyors and the Australian Institute of Architects.

The definitions are as follows: Unit of measurement: square metres (M²).

GROSS FLOOR AREA (GFA)

The sum of the "Fully Enclosed Covered Area" and "Unenclosed Covered Area" as defined.

FULLY ENCLOSED COVERED AREA (FECA)

The sum of all such areas at all building floor levels, including basements (except unexcavated portions), floored roof spaces and attics, garages, penthouses, enclosed porches and attached enclosed covered ways alongside buildings, equipment rooms, lift shafts, vertical ducts, staircases and any other fully enclosed spaces and usable areas of the building, computed by measuring from the normal inside face of exterior walls but ignoring any projections such as plinths, columns, piers and the like which project from the normal inside face of exterior walls. It shall not include open courts, lightwells, connecting or isolated covered ways and net open areas or upper portions of rooms, lobbies, halls, interstitial spaces and the like which extend through the storey being computed.

UNENCLOSED COVERED AREA (UCA)

The sum of all such areas at all building floor levels, including roofed balconies, open verandahs, porches and porticos, attached open covered ways alongside buildings, undercrofts and usable space under buildings, unenclosed access galleries (including ground floor) and any other trafficable covered areas of the building which are not totally enclosed by full height walls, computed by measuring the area between the enclosing walls or balustrade (ie. from the inside face of the UCA excluding the wall or balustrade thickness). When the covering element (ie. roof or upper floor) is supported by columns, is cantilevered or is suspended, or any combination of these, the measurements shall be taken to the edge of the paving or to the edge of the cover, whichever is the lesser. UCA shall not include eaves overhangs, sun shading, awnings and the like where these do not relate to the clearly defined trafficable areas, nor shall it include connecting or isolated covered ways.

BENCHMARKS METHOD OF MEASUREMENT OF BUILDING AREAS

BUILDING AREA (BA)

The total enclosed and unenclosed area of the building at all building floor levels measured between the normal outside face of any enclosing walls, balustrades and supports.

USABLE FLOOR AREA (UFA)

The sum of the floor areas measured at floor level from the general inside face of walls of all interior spaces related to the primary function of the building. This will normally be computed by calculating the "Fully Enclosed Covered Area" (FECA) and deducting all the following areas supplementary to the primary function of the building:

Deductions

- (a) Common Use Areas
- (b) Service Areas
- (c) Non-Habitable Areas

NET LETTABLE AREA (NLA)

Application

Calculating tenancy areas in office buildings and office & business parks.

Definition

- 3.1 The net lettable area of a building is the sum of its whole floor lettable areas.
- 3.2 Net Lettable Area Whole Floors

The whole floor net lettable area is calculated by:

- 3.2.1 taking measurements from the internal finished surfaces of permanent vinternal walls and the internal finished surfaces of dominant portions of the permanent outer building walls
- 3.2.2 included in the lettable area calculation are:
 - 3.2.2.1 window mullions
 - 3.2.2.2 window frames
 - 3.2.2.3 structural columns
 - 3.2.2.4 engaged perimeter columns or piers
 - 3.2.2.5 fire hose reels attached to walls
 - 3.2.2.6 additional facilities specially constructed for or used by individual tenants that are not covered in section 3.2.3

- 3.2.3 excluded from the lettable area of each tenancy are:
 - 3.2.3.1 stairs, accessways, fire stairs, toilets, recessed doorways, cupboards, telecommunication cupboards, fire hose reel cupboards, lift shafts, escalators, smoke lobbies, plant/motor rooms, tea rooms and other service areas, where all are provided as standard facilities in the building
 - 3.2.3.2 lift lobbies where lifts face other lifts, blank walls or areas listed in section 3.2.3.1 above
 - 3.2.3.3 areas set aside for the provision of all services, such as electrical or telephone ducts and air conditioning risers to the floor, where such facilities are standard facilities in the building
 - 3.2.3.4 area dedicated as public spaces or thoroughfares such as foyers, atria and accessways in lift and building service areas
 - 3.2.3.5 areas and accessways set aside for use by service vehicles and for delivery of goods, where such areas are not for the exclusive use of occupiers of the floor or building
 - 3.2.3.6 areas and accessways set aside for car parking
 - 3.2.3.7 areas where there is less than 1.5 metre height clearance above floor level these spaces should be measured and recorded separately
- 3.3 Net Lettable Area (NLA) Sub Divided Floors Follow 3.2 but measure to the centre line of inter-tenancy walls or partitions except where the walls or partitions adjoin public areas, such as lobbies and corridors, in which case measure to the line of the dominant portion of their public area faces.
- 3.4 Treatment of Balconies, Verandahs etc. Balconies, terraces, planter boxes, verandahs, awnings and covered areas should be excluded from tenancy area calculations, but may be separately identified for the purpose of negotiating rentals.

Areas should be measured to the inside face of the enclosing walls or structures. The outer edge of the awning or covered area is the defined edge.

ASSETS AND FACILITIES

| Sustainability and Quality | 52 |
|---------------------------------------|----|
| Management Standards | 53 |
| Useful Life Analysis | 53 |
| Outgoings | 54 |
| Essential Safety Measures | 54 |
| Capital Allowances (Tax Depreciation) | 55 |

Through the Rider Levett Bucknall | Life suite of services, we are able to provide meaningful, practical, commercial advice to clients in the delivery of sustainable and economically responsible projects.

The services help building owners understand the life value and expectancy of their buildings' whole life costs and provide options to extend the useful life of buildings and maintain quality.

ASSETS AND FACILITIES SUSTAINABILITY AND QUALITY

Sustainability is concerned with improving the quality of life while living within the carrying capacity of supporting ecosystems. The planning, delivering and managing of our Built Environment requires a balance between environmental, economic and social factors.

The provision of a more productive, sustainable and liveable Built Environment is best considered in collaboration with all the stakeholders, including owners, managers and tenants. This process should include not only the review of sustainability objectives and initiatives, but address functional requirements and whole of life costings along with the implementation of facilities planning and asset management strategies. Rating systems developed to assist with performance benchmarking within Australia include:

Green Star - The Green Building Council of Australia's (GBCA) six star environmental rating system evaluates: communities, design, as-built of buildings, interiors, building performance in terms of energy and water efficiency, indoor environmental quality and resource conservation.

NABERS - National Australian Built Environment Rating

System is a national program managed by the NSW Department of Environment and Heritage. NABERS measures the environmental performance of Australian offices, tenancies, shopping centres, hotels, data centers and homes. There are NABERS tools for energy efficiency, water usage, waste management and indoor environment quality. Additionally, a NABERS Energy rating forms part of the Building Energy Efficiency Certificate (BEEC) requirement under the Commercial Building Disclosure (CBD) program. The CBD Program requires most sellers and lessors of office space of 2,000 M2 or more to have an up-to-date Building Energy Efficiency Certificate (BEEC).

IS - The Infrastructure Sustainability Council of Australia's (ISCA) Infrastructure Sustainability (IS) rating scheme. IS is Australia's only comprehensive rating system for evaluating sustainability across design, construction and operation of infrastructure. IS evaluates the sustainability (including environmental, social, economic and governance aspects) of infrastructure projects and assets including transport, energy, water and communications sectors.

Quality - Property Council of Australia's (PCA) "a Guide to Office Building Quality" (2006, 2012), provides separate tools for assessing office building quality in new and existing buildings. The tools provide a guide to parameters that typically influence building quality. They offer a voluntary, market-based approach to classifying building characteristics and performance. The 2nd edition of the guide took effect on 1 January 2012 and includes expanded environmental performance criteria for Energy, Water, Waste and Indoor Environment. Additionally, the Building Management criteria was expanded to include Level of Service, Energy and Water Sub-Metering and Life Cycle/Maintenance Plan requirements.

RLB have staff accredited in the use of Green Star, NABERS, along with access to LEED. BREEAM. GreenMark and other international standards.

RLB also provides Building Quality Assessment (BQA) services for PCA Quality gradings.

ASSETS AND FACILITIES MANAGEMENT STANDARDS

Since late 2012 Standards Australia, supported by FMA Australia, PCA, RICS, SBEnrc, TEFMA and other industry bodies, have been involved with the ISO's international Facilities Management (FM) standards initiative.

ISO 41001:2018 specifies the requirements for a facility management (FM) system when an organization:

- a) needs to demonstrate effective and efficient delivery of FM that supports the objectives of the demand organization
- b) aims to consistently meet the needs of interested parties and applicable requirements
- c) aims to be sustainable in a globally-competitive environment

The requirements specified in ISO 41001:2018 are non-sector specific and intended to be applicable to all organizations, or parts thereof, whether public or private sector, and regardless of the type, size and nature of the organization or geographical location.

Separately, there was the release in 2014 of the ISO 55000 series for Asset Management (AM). ISO 55000 specifies the requirements for the establishment, implementation, maintenance and improvement of a management system for asset management, referred to as an "asset management system" for those wishing to:

- improve the realisation of value for their organization from their asset base
- be involved in the establishment, implementation, maintenance and improvement of an asset management system
- be involved in the planning, design, implementation and review of asset management activities along with service providers

Meanwhile, FMA Australia's local efforts include "An Operational Guide to Sustainable Facilities Management" (2010) – a practical document that provides technical guidance in achieving a more sustainable FM approach in an Australian context.

RLB can provide strategic advisory and technical support across the latest in AM and FM practices.

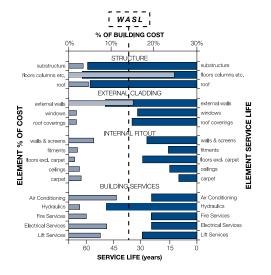

ASSETS AND FACILITIES USEFUL LIFE ANALYSIS

LIFE CYCLE ANALYSIS

Life Cycle Studies recognise that every 'whole' asset consists of many component parts, each with its own life expectancy, interrelationships, resulting quality and maintenance issues. However, in addition to physical obsolescence, useful life expectancy is also dependent on the influence of economic, functional, technological, social and legal obsolescence.

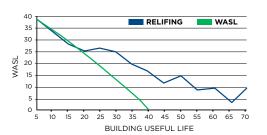

WEIGHTED AVERAGE SERVICE LIFE

Weighted Average Service Life (WASL) is a methodology used to determine the "Useful Life" of an asset. For buildings the WASL is the collective result of applying service life criteria to each element of a cost analysis; excluding capital recurrent expenditure other than routine maintenance.

RELIFING

RElifing takes the "WASL" a stage further by considering the effect of capital upgrades, refurbishments, replacement of plant, architectural fabric and finishes. Below is a graphical representation of a RElifing profile for a typical office building, compared to the base WASL. RElifing analysis is useful for developers, owners and occupiers in financial planning, calculating depreciation and in the negotiation of long term property costs.

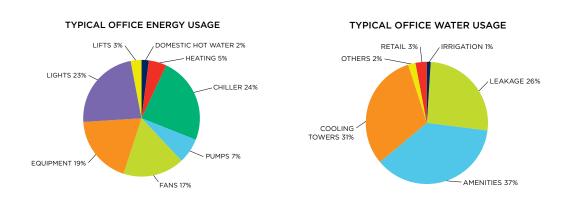

ASSETS AND FACILITIES OUTGOINGS

Outgoings are the costs required to operate a property that are generally recoverable by a Landlord from the tenants. The recovery of outgoings is usually calculated by a sharing of costs amongst tenants relative to their leasehold interest. They generally cover the recurrent costs for the delivery of services, maintenance, power and statutory and management costs.

The level of recovery of outgoings is normally governed and regulated by leases and other agreements with tenants.

- The cost of outgoings varies depending upon:
- the level of management and services provided
- lease agreements
- quality, type and efficiency of the building
- location and statutory regimes applicable

The following graphs highlight typical component usage of both energy and water consumption for office buildings.

ASSETS AND FACILITIES ESSENTIAL SAFETY MEASURES

The following table provides a brief overview of building owners' responsibilities with regard to certifying the annual maintenance of essential safety systems and measures within commercial buildings.

| | Ν | QLD | NSW | SA | TAS | ACT | W A | Ę |
|---|--------------|--------------|--------------|--------------|--------------|-----|--------|----|
| IS MAINTENANCE OF ESSENTIAL SAFETY MEASURES REQUIRED BY LEGISLATION (OTHER THAN BCA)? | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | × | ✓ |
| IS THERE A PRESCRIBED FORM OF CERTIFICATE? | \checkmark | \checkmark | \checkmark | \checkmark | \checkmark | × | × | × |
| CERTIFICATE REQUIRED TO BE DISPLAYED | × | × | \checkmark | × | ✓ | NA | NA | NA |
| CERTIFICATE REQUIRED TO BE FORWARDED TO AN AUTHORITY | × | ✓ | ✓ | ✓ | × | NA | NA | NA |
| CAN FINES BE IMPOSED IF MAINTENANCE IS NOT CARRIED OUT? | ✓ | ✓ | ✓ | × | ✓ | ✓ | NA | ✓ |

The relevant legislation governing the essential safety measures by state are:

- ACT ACT Emergencies Act 2004
- NSW Environmental Planning and Assessment Regulations 2000
- **QLD** Queensland Fire and Emergency Services Act 1990 & Fire and Rescue Service Amendment Act 2006
- SA SA Development Act 1993 & Minister's Specifications SA 76
- TAS Fire Services Act 1979 & General Fire Regulations 2010
- VIC Building Regulations 2006 Part 12 Building Regulations 2018 Part 15
- WA Building Regulations 2012 & Building Amendment Regulations 2014
- **NT** Northern Territory Fire and Emergency Regulations

Note:

The above is a brief guide only. Other state or national legislation and laws may also be relevant. It is recommended that all property owners consult a building surveyor regarding responsibilities associated with maintenance of essential measures within their buildings.

ASSETS AND FACILITIES CAPITAL ALLOWANCES (TAX DEPRECIATION)

The Australian Taxation Office (ATO) allows a tax deduction for the recovery of the cost of assets used in a business or for the production of income. The Income Tax Assessment Act (ITAA) allows two types of allowances for assets:

Division 40 - Depreciating Assets

Assets with a limited effective life that are reasonably expected to decline in value. The decline in value is based on the cost and effective life of the depreciating asset, not its actual change in value. Examples of these are carpet, air conditioning plant, lights etc.

Division 43 - Capital Allowances

Capital allowances are the building allowance and structural improvement deductions that are available for buildings. Depreciating rates are either 2.5% or 4% dependent on the use of the building and construction commencement date.

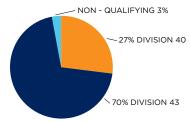

The ATO issued the latest effective life review of assets under TR2022/1 which came into effect on the 1st July 2022.

The following broad principles outline the rates of depreciation deductions relative to income producing assets under ITAA 1997 (Division 40 & 43).

- The effective life and hence the rate of depreciation of an item of plant can be self-assessed by the taxpayer
- Depreciating Assets (Division 40) are subject to a balancing adjustment on disposal. Capital works deductions (Division 43) are subject to Capital Gains Tax on disposal
- Low value pool option for assets less than \$1,000 in value depreciated at 18.75% in the first year and 37.50% in subsequent years

The Diminishing Value rate is currently 200% of Prime Cost rate (excluding low value pool), with the effect of accelerating the tax write off in earlier years of the asset's life

TOTAL ALLOWANCES (\$)

Typical percentage apportionment of depreciation allowances based on new \$300m Commercial Office Tower including fitout with 6 Star Green Star certification.

RLB employs qualified staff, who are registered with the Tax Practitioners Board under the Tax Agent Services Act 2009, for the preparation of Capital Allowance Reports.

| SCHEDULE OF ASSETS | PRIME COST % | DIMINISHING VALUE % |
|--|--------------------|---------------------|
